"Climax" Sterilizers

We exhibit the Sterilizers which have been chosen for exclusive use in five Hospitals now being built in New York City, on the basis of excellence of design and construction, simplicity and quickness of operation and extreme durability.

Hospital Supply Co's Service

It is our hope that Hospital Authorities, Architects and others interested may realize the desire and intention of this Company to deserve their patronage through ability to serve them to a greater extent than the mere sale of equipment usually implies.

EDISON Electric Cooking Equipment In This Modern Hospital

In the kitchens of the new Latter Day Saints' Hospital at Salt Lake City, said to be the most modern hospital in the United States, you will find complete Edison Electric Cooking and Baking equipment. This is just one of the many modern hospitals to adopt Edison Electric equipment.

The patients are thus assured of perfect, well cooked food and the hospital has found the clean, convenient method of cooking—electrically. And the operating cost is remarkably low.

See our complete exhibit of Electric Cooking Equipment on the Steel Pier, Atlantic City, at Convention of American Hospital Association

EDUCATIONAL SYMPOSIUM A SPECIAL FEATURE OF PROTESTANT MEETING

AS IN previous years, the American Protestant Hospital Association will hold its sixth annual convention preceding that of the American Hospital Association, at Hotel Morton, Atlantic City, N. J., September 25, 26 and 27.

The meeting this year will give an important place to an educational symposium, to community problems, the usual group meetings and a pictorial presentation of Protestant hospital work.

The convention will open Saturday morning at 9:45, with devotions conducted by the Rev. Henry Merle Mellon, pastor, Presbyterian Hospital, Atlantic City. Devotions will be followed by an address of welcome by the Hon. Edward W. Bader, mayor of Atlantic City, and response will be made by Alice Thatcher, superintendent, Christ Hospital, Cincinnati.

This will be followed by the president's address, by the Rev. Newton E. Davis, corresponding secretary, Board of Hospitals, Homes and Deaconess Work, Methodist Episcopal Church, Chicago.

The remainder of the session will be taken up with two papers. "The Relation of the Christian Hospital to the Life of the Community," is the subject of a paper to be presented by the Rev. E. F. Bachman, superintendent, Mary J. Drexel Children's Home and Hospital, Philadelphia. This paper will be discussed by the Rev. John G. Benson, general superintendent, White Cross Hospital, Columbus, Ohio.

Following the discussion, Louis J. Bristow, superintendent, Southern Baptist Hospital, New Orleans, will read a paper, "The Responsibility of the Community to the Hos-

pital," and discussion will be led by the Rev. Arch C. Cree, general superintendent, Georgia Baptist Hospital, Atlanta, Ga.

An open forum, or round table, will then be conducted by Dr. C. S. Woods, superintendent, St. Luke's Hospital, Cleveland. The subjects for the round table will not be assigned, as it is expected that delegates will bring for discussion the important questions and problems arising in their hospital during the year. Following announcement of committees the session will adjourn for lunch at 12:30.

The afternoon session will open at 2, with devotions and song service. Then minute business will be taken up and the reports of standing committees will be heard. The report of the executive secretary will be given by the Rev. Frank C. English, whose headquarters are now at the Christ Hospital, Cincinnati.

Report on Canadian Hospitals

At this session attention will be directed to the work of Canadian hospitals in the paper, "Advancement of the Work in the Protestant Hospitals of Canada," by Grace M. Fairley, superintendent of nurses, Victoria Hospital, London, Ont. Miss Fairley is also president-elect of the Canadian Nurses' Association.

The remainder of the afternoon will be taken up with the educational symposium. The first topic, "The Responsibility for Educating Interns," will be discussed by the Rev. Herman L. Fritschel, superintendent, Milwaukee Hospital, Milwaukee. The responsibility for training supervisors will be discussed by the Rev. John G. Martin, superintendent, St. Barnabas Hospital, Newark, N. J.

Left, the Rev. Newton E. Davis, president; right, Robert Jolly, president-elect.

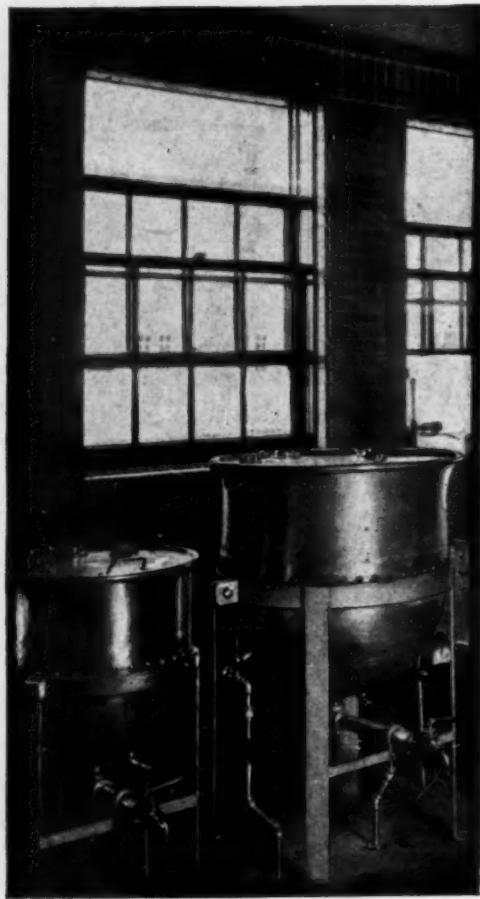

Illustration shows some of the "Wear-Ever" equipment used in St. Mary's Hospital, Rochester, Minn.

"Wear-Ever"

Aluminum
Kitchen Ware

THE same advantages that have caused millions of American housewives to depend upon "Wear-Ever" for every cooking operation in the home, recommend the use of "Wear-Ever" Kitchen Equipment in the preparation of foods in hospitals and other institutions.

These advantages are: Fuel economy; many years of service; extreme purity and wonderful flavor of foods; and the saving in labor. Furthermore, "Wear-Ever" utensils have no lining to wear off.

Write for further particulars regarding the use of "Wear-Ever" in your institution.

...

An invitation

Delegates attending the Convention at Atlantic City in September are cordially invited to visit the "Wear-Ever" exhibit at Booth No. 209 where a complete showing of "Wear-Ever" Steam Jacketed Kettles and other utensils for large kitchens will be on display.

CONVENTION SUPPLEMENT

17

Mrs. Mary C. Eden, directress of nurses, Presbyterian Hospital, Philadelphia, will discuss the subject with respect to educating student nurses. Responsibility with respect to the development of dietitians will be discussed by Bertha Beecher, dietitian, Christ Hospital, Cincinnati, and responsibility for training orderlies, male and female, to the advantage of the hospital, will be discussed by Blanche Fuller, superintendent, Nebraska Methodist Episcopal Hospital, Omaha, Nebr.

The Saturday evening meeting will be the annual banquet session at Hotel Morton, at 6:15. The speaker of the evening will be announced later. Guests will have the privilege of making after-dinner, voluntary responses to the toast, "Ourselves" and then, "Others." Following the banquet a paper, "The History of the Rise and Development of Baptist Hospitals in America," will be read by Dr. B. A. Wilkes, superintendent, Missouri Baptist Sanitarium, St. Louis, Mo. This is the second paper on the development of denominational hospitals in America, to be presented at the Protestant Hospital conventions. The first, on the development of the Lutheran deaconess' hospital work and the development of the Passavant hospitals was presented last year by Sister Martha Pretzlaaff, superintendent, Passavant Hospital, Pittsburgh.

Church Services Sunday Morning

As has been the custom in previous years, Sunday morning will be given over to devotions at the various Protestant churches of the city. The afternoon session, to be held at the auditorium, Hotel Morton, will open with a song service, to be led by Robert Jolly, superintendent, Baptist Hospital, Houston, Tex., president-elect of the association. Following the half-hour of singing the session will take the form of group meetings for denominational hospital representatives, until adjournment at 5 p. m. It is expected that the group meetings will be well attended this year.

Sunday evening's session will be held at the Presbyterian Church at 7:30. The first part of the meeting will be taken up with devotions and music by the choir. The remainder of the session will be given to the address of the Rev. William Chalmers Covert, D.D., LL.D., general secretary, Presbyterian Board of Christian Education, Philadelphia.

Monday morning's session will open with devotions by the Rev. C. O. Pederson, superintendent, Lutheran Hospital, Brooklyn, N. Y. The first paper of the session will be read by Clarence H. Baum, superintendent, Lake View Hospital, Danville, Ill., who will present the subject, "Coordinating Hospital Administration, Beginning With the Superintendent and the Building of an Efficient Hospital Down to the Janitor."

This will be followed by the report of the committee on findings, articulating the reports of standing committees.

"The Relation of a Central State Department of Institutions and Agencies to Local Institutions," is the subject of a paper to be presented by the Hon. William J. Ellis, commissioner, department of institutions and agencies, Trenton, N. J.

The other paper of the session is on the subject, "What Makes a Hospital Great? Are We Measuring Up to Our Responsibilities?" to be presented by the Rev. G. T. Lumpkin, superintendent, North Carolina Baptist Hospital, Winston-Salem, N. C.

A round table to be conducted by C. J. Cummings, superintendent, Tacoma General Hospital, Tacoma, Wash., will complete the session.

Monday afternoon will be taken up with a visitation of the exhibits of the American Hospital Association con-

vention, to be in charge of the Hospital Exhibitors' Association.

The officers of the association are the Rev. N. E. Davis, president; Robert Jolly, president-elect, and the Rev. J. H. Bauernfeind, superintendent, Evangelical Deaconess Hospital, Chicago, vice-president. The Rev. Frank C. English is executive secretary.

The trustees are Alice Thatcher; B. A. Wilkes; Arch C. Cree; L. C. Reynolds, superintendent, Methodist Hospital, Los Angeles, Calif.; and Mrs. C. E. Davis, Seattle, Wash.

RECEPTION REPLACES BANQUET AT A. H. A. CONVENTION

In place of the banquet, which has been the main social feature of preceding conventions of the American Hospital Association, a reception, entertainment and informal dance will be held this year at the Atlantic City convention. It will be held at Marine Hall on the Steel Pier, Thursday evening, September 28, at 8 o'clock, in honor of the exceptional number of foreign representatives and governmental and state officials who will attend the meeting, and will be under the auspices of the New Jersey Department of Institutions and Agencies.

Among the governmental representatives officially delegated to be present are a senior medical officer of the British Ministry of Health, representatives of the U. S. Department of Commerce and state and local officials.

*Hospital Authorities Themselves
Helped To Design This System*

SCORES of authorities, architects and engineers, men and women too, told us what they wanted in a nurses' call system. Then, Connecticut engineers designed this system—custom-built to fulfill the demands of the modern hospital. That is why in Connecticut devices only do you find these features. That is why the Connecticut system meets hospital requirements—exactly. If you are building or remodeling, or if your present call system is inadequate, you will do well to investigate Connecticut equipment. Ask for our illustrated catalogue.

Signal Systems Division

Connecticut TELEPHONE & ELECTRIC **Company**
Meriden, Connecticut, U.S.A.

Cold Molded Insulation Signal Systems Radio and Automotive Devices

**Eight Connecticut
Features**

1. Safeguard receptacle which insures uninterrupted service. When plug pulls out, the signal automatically flashes.
2. Easily detachable plug—long life to the cord.
3. "Tyrex" washable cord—important for sanitary reasons.
4. Non-breakable buttons.
5. Signals flash when button is pressed to buzzer position.
6. Silent or audible switch control.
7. Non-relay multiple system—low maintenance cost.
8. Washable plates, finished with Egyptian lacquer.

SPECIAL PROBLEMS OF CHILDREN'S HOSPITALS TO BE DISCUSSED BY LEADERS

SPECIAL problems and the administration of children's hospitals will feature the papers and discussions of the first annual meeting of the Children's Hospital Association of America, to be held in Atlantic City, September 30, in conjunction with the meeting of the American Hospital Association.

The program will open Thursday at 9:30 a.m., with Robert E. Neff, superintendent, Robert W. Long State Hospital, Indianapolis, as chairman. Greetings from the American Hospital Association will be expressed by Dr. A. C. Bachmeyer, superintendent, Cincinnati General Hospital, Cincinnati, president, and by Dr. R. G. Brodrick, director, Alameda County Hospitals, San Leandro, Calif., president-elect.

"Medical Instruction in the Children's Hospital" is the subject of a paper by Dr. J. Claxton Gittings, medical director, house staff, Children's Hospital, Philadelphia, which will be discussed by Dr. John P. Scott, Children's Hospital, Philadelphia. The problem of contagion with respect to diphtheria will be discussed by Dr. Wilburt C. Davison, Baltimore, in his paper, "Menace of Diphtheria Carriers."

"What Has Metabolic Research Taught Us in the Nutrition of Children?" is the subject of a paper to be presented by Dr. Mary Schwartz Rose, professor of nutrition, Teachers College, Columbia University, New York. This paper will be discussed by Dr. Alfred Hand, attending physician, Children's Hospital, Philadelphia.

The nursing phase of the children's hospital will find expression in the paper, "Pediatric Nursing," by Gladys

Sellow, R.N., director, nursing service, Babies' and Children's Hospital, Cincinnati. Mary C. Stewart, R.N., superintendent, Children's Memorial Hospital, Chicago, will discuss Miss Sellow's paper.

Pathological service will be represented by Dr. Arthur D. Waltz, assistant pathologist, Children's Hospital, Philadelphia, who will present a paper on "Organization of Pathological Service in the Children's Hospital."

The morning meeting will conclude with the reports of officers and appointment of committees.

The afternoon program, which will open at 2:30, will be taken up with the problems of organization and administration of children's hospitals, as follows:

1. Board of directors—Mrs. John W. Gary, St. Luke's Hospital, Chicago.
2. Attending staff—Dr. John F. Sinclari, Philadelphia.
3. Resident staff—Dr. Edward S. Thorpe, Jr., Philadelphia.
4. Superintendent of nurses—Elizabeth Pierce, superintendent, Children's Hospital, Cincinnati.
5. Dietitian—Lulu G. Graves, consultant dietitian, New York.
6. Social service—Mrs. Charles W. Webb, director of social service, Lakeside Hospital, Cleveland.
7. Occupational therapy—Elsa A. Dudenhoefer, director of occupational therapy, Milwaukee Children's Hospital, Milwaukee.
8. The General hospital—Dr. Malcolm T. MacEachern, associate director, American College of Surgeons, hospital activities, Chicago. Informal discussion will follow.

Left, Bena M. Henderson, superintendent, Milwaukee Children's Hospital, Milwaukee, Wis., secretary; right, Robert E. Neff, superintendent, Robert W. Long State Hospital, Indianapolis, president.

FAICHNEY
 IMPROVED CLINICAL
THE THERMOMETER

Tip Wont Break
 3 Times out of 4

"Faichney's" Improved Thermometers take a correct temperature register in one minute or less, are certified and meet all State and Government requirements.

They will not break except under greatest strain and have indestructible index that no antiseptic solution of alcohol will affect.

At the A. H. A. Convention visit our Booths 239 and 240

See the Demonstration and Tests of Reliability

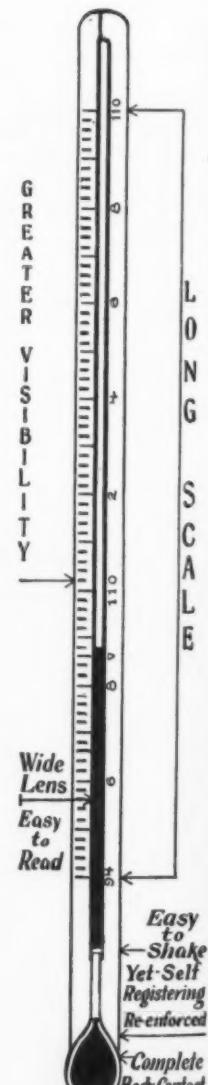

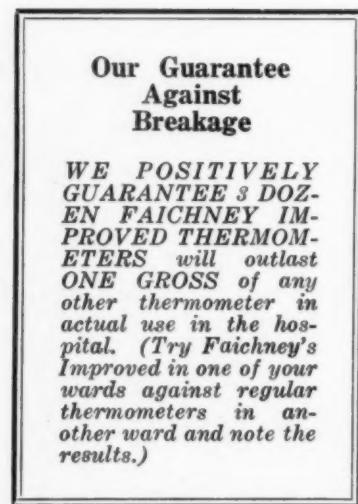

FAICHNEY Instrument Corporation
 WATERTOWN, N. Y.

That's why so many hospitals specify "Faichney's" Improved Thermometers

The strength and life of this thermometer depend upon the special annealing process known only to Faichney.

**Our Guarantee
 Against
 Breakage**

WE POSITIVELY GUARANTEE 3 DOZEN FAICHNEY IMPROVED THERMOMETERS will outlast ONE GROSS of any other thermometer in actual use in the hospital. (Try Faichney's Improved in one of your wards against regular thermometers in another ward and note the results.)

SYMPOSIA AND REPORTS GIVEN PROMINENCE ON OCCUPATIONAL THERAPY PROGRAM

SYMPOSIA on the different types of curative work, reports from various institutions and a large exposition of work done by patients will be features of the tenth annual meeting of the American Occupational Therapy Association, to be held at the Hotel Brighton and at the Steel Pier, Atlantic City, N. J., September 26-29, inclusive.

Preceding the opening session, Monday, September 26, a meeting of the board of management is scheduled for Sunday afternoon at 3 o'clock. The opening session will include greetings from the president and president-elect of the American Hospital Association, Dr. A. C. Bachmeyer, superintendent, Cincinnati General Hospital, Cincinnati; and Dr. R. G. Brodrick, director, Alameda County Hospitals, San Leandro, Calif., respectively; the president's address by T. B. Kidner, New York, and the report of the secretary-treasurer, Mrs. Eleanor Clarke Slagle, New York.

In addition the session will include two addresses, one by Dr. Horatio M. Pollock, New York Hospital Commission, New York, and one by Everett S. Elwood, managing director, National Board of Medical Examiners, Philadelphia, who will speak on the subject of the program of the board with respect to the spread of occupational therapy.

Occupational therapy work with children will be one of the main topics at the Monday afternoon program, to be held at the Right Central Pier Hall, Steel Pier, at 2:30. A paper on "Organizing an Occupational Therapy Department in a Children's Hospital," will be presented by Winifred Conrick, Riley Memorial Hospital, Indianapolis.

This will be followed by a symposium on various topics,

each leader being limited to a five-minute talk. Some of the topics to be discussed are: Precautions necessary with orthopedic cases, by Marjorie Taylor, Robert Breck Brigham Hospital, Boston; occupational therapy during convalescence, by Ruth C. Browning, Convalescent Home and School of the House of St. Giles the Cripple, Garden City, N. Y. The discussion on this subject will be led by Marian Clark, University Hospital, Ann Arbor. The subject of occupational therapy for out-patients and the homebound will be handled by Carolyn Bean, Fraternity for Friendly Service, New York; and the subject of the relationship between the work of the occupational therapist and the teacher in a children's hospital or school for crippled children will be discussed by Winifred Smith, Louisville, Ky. The remaining topic to be discussed at this session is the disposal of the products of children's departments, by Eloise Finley, Cleveland Cripples Association, Cleveland. The discussion on this subject will be by Mrs. Ella C. Ficklin, Children's Hospital, St. Louis, Mo.

An informal reception of members and guests by the officers and board of management of the association will take place Monday evening at 8:30, at Hotel Brighton.

Tuesday morning's program, which will open at 10 o'clock, will be taken up with the subject of work with mental diseases, and a symposium. The subject of occupational therapy in mental hospitals will be presented in two papers, one, "Occupational Therapy From the Viewpoint of the Superintendent of a State Mental Hospital," by Dr. C. Floyd Haviland, Manhattan State Hospital, Ward's Island, N. Y., and the other, "Occupational Therapy From the Viewpoint of the Superintendent of a Private Mental Hospital," by Dr. W. W. Richardson, physician in

T. B. Kidner, president, and Mrs. Eleanor Clarke Slagle, executive secretary, American Occupational Therapy Association.

Nursery NAME NECKLACE Baby Identification

Where
the *Practical*
Weds the *Artistic*

Rarely is it possible to design into a nursery accessory all the qualities of dependability, facility, and cheerful attractiveness.

Rarer still is it that the hospital can modernize its nursery service by the use of such an improved accessory, without incurring an additional expense.

The Nursery Name Necklace, however, does bring identification service into the realm of beauty, accompanied by the security of infallibility, and offers the hospital a self-sustaining plan of use.

*Perhaps you would like detailed proof and sample necklace? It will be furnished, without obligation,
—for the mere asking.*

charge, Mercer Sanitarium, Mercer, Pennsylvania.

The symposium will include discussions on five topics of much interest to workers. The subject of arranging for practice training for undergraduate students in state hospitals will be presented by Mary Putman, division of mental health, State Department of Welfare, Harrisburg, Pa., and will be discussed by Harriet A. Robeson, chief occupational therapist, Kings Park State Hospital, Kings Park, N. Y.

Problem of Attendants

The value and limitations of attendants in occupational work in mental hospitals will be discussed, the speaker to be announced later. Some special problems in mental hospitals will be presented by Mrs. Henrietta G. Price, chief occupational therapist, Sheppard and Enoch Pratt Hospital, Baltimore, Md., and will be discussed by Pauline Gundersen, chief women's occupational therapy department, Bloomingdale Hospital, White Plains, N. Y.

Amy Baker, Four Winds Sanitarium, Katonah, N. Y., will talk on the subject of organizing occupational therapy in a small private hospital, and her talk will be discussed by Kathryn H. Root, the Medical Workshop, Stamford, Conn. Occupational work in an out-patient clinic for mental cases, will be presented by Marguerite Emery, Mt. Sinai Hospital, New York, and waste materials available for work in a large mental hospital will be the subject discussed by Frank P. Lane, Fair Oaks Sanitarium, Cuyahoga Falls, Ohio.

The industrial and rehabilitative phases of occupational therapy will receive especial attention on the Tuesday afternoon program in two papers. "The Interrelation Between Occupational Therapy and Subsequent Vocational or Industrial Rehabilitation," is the subject of the paper by Oscar M. Sullivan, director, re-education of disabled persons, State Department of Education, St. Paul, Minn. The other paper will be on the subject of "The Curative Workshop From the Viewpoint of Industrial Accident Compensation," by W. F. Faulkes, president, National Civilian Rehabilitation Conference, and Wisconsin State Supervisor of Vocational Education, Milwaukee, Wis.

Industrial and Rehabilitative Phases

The symposium will be opened by Lena Lewis, Industrial Workshops, Jewish Aid Society, Chicago, who will speak on the value of curative work as a means of decreasing dependency. This subject will be discussed by Elizabeth Wise, the Curative Workshop, Rochester, N. Y. The combining of curative work with vocational training in a tuberculosis sanatorium will be discussed by Mrs. Gertrude Sample, U. S. Veterans' Bureau Hospital No. 60, Oteen, N. C. Martha Emig, Duluth Occupational Therapy Association, Duluth, Minn., will talk on the establishment of occupational therapy clinics in cooperation with a state department of re-education for disabled persons.

The annual banquet of members and guests will be held Tuesday evening, the place to be decided upon later. Instead of the usual speeches, it has been decided to devote the evening to brief reports from state and local associations. Five minutes will be given to the presentation of each report.

Wednesday morning's program will feature a paper on "Prescribing Occupational Therapy for Sanatorium Patients, With Special Reference to Their Physical Limitations," by Col. David Townsend, superintendent, National Sanatorium, National Sanatorium, Tenn., and a symposium. The subject of outdoor occupations for sanatorium patients will be presented by Dorothy Rouse, U. S. Veterans' Bureau Hospital, Dawson Springs, Ky.,

and the discussion on this subject will be led by Mary E. Shanklin, National Military Home, Dayton, O. Other speakers will follow.

The other subjects for discussion at this session are the hospital or sanatorium magazine as an occupational therapy activity, by Mrs. Byron M. Harman, Essex Mountain Sanatorium, Verona, N. J., and using sanatorium patients as assistants, by Beatrice A. Lindberg, Minnesota Sanatorium Commission, St. Paul, Minn. The discussion on this subject will be opened by Dr. Mary G. Schroeder, Illinois Society of Occupational Therapists, Chicago.

Preceding the symposium on occupational therapy in general hospitals will be an address by Dr. Joseph C. Doane, director, Philadelphia General Hospital, Philadelphia, on the subject, "Occupational Therapy in a General Hospital."

Some of the problems of administration of occupational therapy in general hospitals will be presented by Mary F. Merritt, Bellevue Hospital, New York, and will be discussed by Mrs. Olive Carey, Michael Reese Hospital, Chicago. Alice H. Dean, Evanston Hospital Association, Evanston, Ill., will talk on the subject of the volunteer worker, and her talk will be discussed by Grace Bryant, supervisor, Work for Junior League, Erie, Pa.

Rooms and Equipment

Rooms and equipment for general hospitals is the subject to be presented by Marion Hess, Cook County Hospital, Chicago. This subject will be discussed by Mrs. May K. Kribben, Barnes Hospital, St. Louis, Mo. Dr. Ransom J. Sartwell, superintendent, State Infirmary, Howard, R. I., will introduce the subject of occupational therapy in an infirmary and J. Goodfriend, assistant director, Montefiore Hospital for Chronic Diseases, New York, will speak on occupational therapy in a hospital for chronic diseases. Both of these subjects will be discussed by Mrs. Alice T. Stratton, Metropolitan Hospital, Welfare Island, N. Y.

The Wednesday afternoon session will be a business meeting devoted to the reports of committees, as follows:

1. Reports of standing committees

- (a) Publicity and publications—Chairman, Dr. Wm. R. Dunton, Jr., Harlem Lodge, Catonsville, Md.
- (b) Finance—Chairman, Mrs. F. W. Rockwell, Philadelphia, Pa.
- (c) Research and efficiency—Chairman, Mrs. May K. Kribben.
- (d) Installations and advice—Chairman, Harriet A. Robeson.
- (e) Methods of teaching—Chairman, Alberta Montgomery, Walter Reed Hospital, Washington, D. C.

2. Reports of special committees

- (a) Exhibits at annual meetings—Chairman, Mary E. Shanklin, National Military Home, Dayton, Ohio.
- (b) National registration of qualified occupational therapists—Chairman, Dr. John D. Adams, Boston, Mass.
- (c) Resolutions—Chairman, (to be appointed).
- (d) Nominating committee—Chairman, Mrs. Mary L. Abbey, St. Luke's Hospital, Chicago.

3. Election of officers.

4. Any other business.

The concluding session of the meeting, to be held Wednesday evening at 8 o'clock, at Brighton Hotel, will be a meeting of the board of management.

Throughout the convention the exhibition of patients' work, charts of organization and plans and photographs will be on display in the large hall of the Steel Pier.

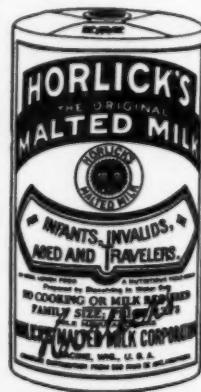

from a Dietetic Angle

Horlick's the Original Malted Milk

*is Standard Equipment in Every
Modern Hospital*

THROUGHOUT the length and breadth of the hospital world Horlick's Malted Milk is known as a *standard* food product. On its uniform quality and scientifically-proportioned nutritive value are based the decisions of many dietetic problems.

For the feeding of children, whether new-born babies or malnourished older patients, this combination of rich, whole milk and whole cereals is invaluable. Through the entire gamut of hospital dietetics, "Horlick's" is found useful to physician and nurse and pleasing to the patient.

Hospitals and institutions find it convenient and profitable to use the Dumore No. 6 electric mixer in preparing Horlick's Malted Milk beverages for patients and for X-Ray work. This sturdy mixer is provided for institutions using our product at the nominal cost of \$10.50.

You are invited to visit us at

EDUCATION, RESEARCH AND SPECIAL PROBLEMS FEATURE DIETITIANS' PROGRAM

EDUCATION of student dietitians and nurses, problems in the management of dietary departments and metabolic research are some of the subjects that will be given a prominent place on the program of the fourth annual meeting of the Hospital Dietetic Council, to be held in Atlantic City, September 27-30.

The program will open Monday afternoon, at 2 p. m., with addresses by the president and president-elect of the American Hospital Association, Dr. A. C. Bachmeyer, Cincinnati, and Dr. R. G. Brodrick, San Leandro, Calif., respectively. Then will follow the president's address, by Rena S. Eckman, dietitian, Warren State Hospital, Warren, Pa. The session will close with a symposium on recent advances in the field of administrative dietetics, by members of the council.

Tuesday morning's session will open with a paper, "State Requirements for Nurses," by Alice Shepard Gilman, R.N., Albany, N. Y. Mary A. Foley, director of dietetics, Kahler Corporation, Rochester, Minn., will speak on "Essential Factors in Training Student Dietitians." The session will close with a talk on editorial food work, by Winifred Wishart, Pictorial Review Co., New York.

Tuesday afternoon's program will open with a paper, "The Relation of Metabolic Research to the Dietitian's Point of View," by Walter H. Eddy, Ph.D., Columbia University, New York. "The Metabolic Ward in the Hospital" will be handled by Orlando H. Petty, University of Pennsylvania Hospital, Philadelphia.

In the evening at 8 o'clock members of the council will assemble with the American Hospital Association for a reception and dance.

Department Organization Discussed

The subject of the dietary department—its development and management will be the dominant note in the program for Wednesday morning. "The Working System of a Dietary Department" will be handled by Elizabeth Miller, Philadelphia General Hospital, Philadelphia.

"Planning and Equipping Hospital Kitchens" will be the subject of a paper by Dr. R. G. Brodrick, director, Alameda County Hospitals, San Leandro, Calif., president-

elect, American Hospital Association. The program will conclude with a paper on the study of equipment for a hospital kitchen, by Belle Haggerty, Fabiola Hospital, Oakland, Calif.

Wednesday afternoon's meeting will take the form of a joint meeting with the dietetic section of the American Hospital Association, at 2 p.m., the program of which will be found in the complete program of the association.

The evening program will open at 8 o'clock with a paper, "Diet as Related to the Healing of Fractures," by Irene Willson, Homeopathic Hospital, Pittsburgh. One of the special features of the meeting will be an address, "Hypersensitivity and Diet," to be given by Dr. Arthur F. Coca, department of immunology, Society of the New York Hospital, New York.

The session will conclude with a business meeting.

Thursday morning's program will be devoted largely to the subject of diabetes and gastro-intestinal disorders. The session will open at 10, with the paper, "Gastro-intestinal Disorders, Their Causes and Treatment," by Dr. Martin Rehfuss, Philadelphia. "Recent Findings in Diabetes" will be handled by Dr. Henry James Spencer, Cornell Clinic, New York. Dr. Howard F. Root, New England Deaconess Hospital, Boston, will conclude the session with a paper on the results of insulin treatment.

The afternoon program will be taken up with round table discussions on "Why My Work Appeals to Me," "Teaching of Nurses," and "Dietary Administration," to be conducted by Mary E. Rockwood, University of Michigan Hospital, Ann Arbor. A paper on "Metabolism" will be read by Marion Vye, West Baden Springs, West Baden, Ind. "Fitting the Dietitian to the Position" is the subject of a paper to be read by Lulu G. Graves, New York.

The concluding session will open with a paper, "Amino Acids and Their Relations to Health and Disease," by Dr. L. H. Newburg, University of Michigan Hospital, Ann Arbor, Mich. "Infant Feedings as Prescribed by Various Hospitals," will be handled by Ada B. Lothe, Milwaukee County Hospital, Milwaukee, Wis. The concluding paper will be on the subject of "Intestinal Disorders and Infant Feeding," the speaker on this topic to be announced later.

Left to right, Mrs. John Henry Martin, executive secretary; Rena S. Eckman, president; and Margaret Fotheringham, treasurer.

BASIS FOR MUTUAL UNDERSTANDING—TOPIC FOR SOCIAL SERVICE SECTION

SOCIAL service, that humanitarian movement which is constantly assuming a more important place in hospital work, will this year be represented on the program of the American Hospital Association by a section devoted to the subject of "A Basis for Mutual Understanding Between Doctors and Social Workers," which will be discussed from three different and important angles by leaders in hospital and social work.

The section will be held Tuesday afternoon, September 28, from 2 to 4 in Left Central Hall, with Mrs. Charles W. Webb, Lakeside Hospital, Cleveland, as chairman, and Lena R. Waters, chief, social service department, Hospital of the University of Pennsylvania, Philadelphia, as secretary. Both of these people are well known in social service work, Mrs. Webb having been chosen president of the American Association of Hospital Social Workers at the recent National Conference of Social work held in Cleveland. She has for many years been actively engaged in social service work in the Cleveland hospitals and has also taken a prominent part in the activities of the association. It will be remembered that at the recent meeting, as chairman of the functions committee she reported the results of 200 hospital social service case records which had been analyzed by the committee and tabulated by Dr. Louise Stevens Bryant, statistician, Committee on Dispensary Development, New York. The whole study covered approximately 1,000 social cases reported on a carefully prepared questionnaire from eighty different social service departments in different parts of the country, covering the three headings: diagnosis, interpretation and constructive measures for health conservation.

Lena R. Waters has for many years been secretary of the association, and is now director of social service at the University Hospital, Philadelphia. The other officers of the association are first vice-president, Dorothy Ketcham, University Hospital, Ann Arbor, Mich.; second vice-president, Edith Baker, social service department, Barnes Hospital, St. Louis, Mo.; third vice-president, Helen Myrick, Illinois Society for Mental Hygiene, Chicago, and treasurer, Eleanor Dodge, social service department, Barnes Hospital, St. Louis, Mo.

In contrast to the past few years the program this year will not cover a wide variety of subjects and be divided in sections with meetings extending over two or

three days, but will be concentrated upon the one vital subject in hospital work, in one session. This year there will be no psychiatric section, since this section broke away from the association at the recent meeting in Cleveland and formed what is now known as the American Association of Psychiatric Social Workers, under the presidency of Mrs. Maida H. Solomon, Boston, Mass.

The program will open with an address by Dr. Joseph C. Doane, medical director and superintendent, Philadelphia General Hospital, Philadelphia, who will discuss the main topic from the standpoint of the hospital executive. Because of his experience with the department at the Philadelphia General Hospital and his wide knowledge of hospital work in general Dr. Doane is expected to handle the subject most thoroughly and bring out many points that will contribute much to the discussion at this section.

Dr. Doane's paper will be followed by a discussion, the speaker to be announced later, and by general discussion from the floor.

Throughout the session the papers will be limited to twenty minutes and discussions will be limited to ten minutes for the opening speaker and five minutes for the speakers who follow. So that every speaker may be properly identified each is asked to announce name and hospital connection.

A basis for mutual understanding from the standpoint of the social worker will be presented in a paper to be read by Gertrude L. Farmer, director, department of medical social work, Boston City Hospital, Boston, whose experience in hospital social service qualifies her to understand the problems that arise constantly between the medical staff and the social worker as well as between hospital executives and the social worker. Miss Farmer recently published a booklet, "Ten Years of Social Work at Boston City Hospital."

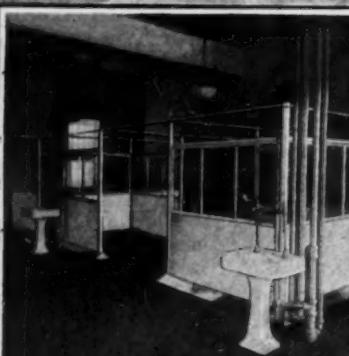

This paper will also be discussed by a speaker whose name will be announced later.

The standpoint of the visiting physician will be represented by Dr. John E. Jennings, attending surgeon, Brooklyn, Greenpoint, and St. Catherine's Hospitals, Brooklyn, N. Y., who will analyze the problems of the social service department in the light of the medical staff and, in particular the visiting physician.

The section will close with the election of officers.

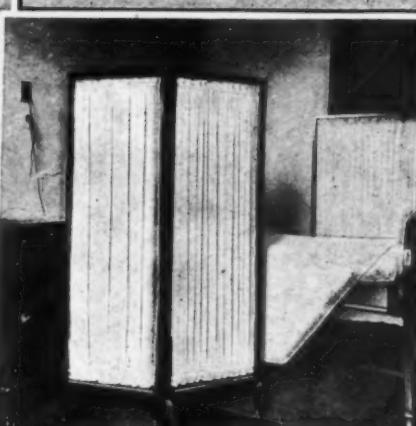

Mrs. Charles W. Webb, Lakeside Hospital, Cleveland, president, American Association of Hospital Social Workers, who will preside over the social service section.

*Putting Ward Space
in Demand*

WHEN renting ward space is a problem, Sanymetal Ward Cubicles offer a perfect solution. With these flexible, sanitary, moderate-priced metal partitions, private or semi-private bed spaces are provided for. The patient has all essential seclusion, without the high rate of a private room. These enclosures also reduce the danger of contagion.

Sanymetal is furnished for Cubicles, Bed Screens (stationary, movable, or folding), fly doors, and interior enclosures of any sort. Extensively used in leading hospitals.

WORKMEN'S COMPENSATION AND MIDDLE-CLASS PATIENTS FEATURE PROGRAM

IT IS doubtful if any previous conference of the American Hospital Association has been as promising as the one for 1926. With Atlantic City as the ideal spot for holding such a meeting, with the big remodeled Steel Pier as the exhibit hall and with three meeting rooms on the Pier there is every indication that the convention will go down in history as the most successful one that has ever been held.

This year will see discussed many of the vital problems that superintendents have thought about for years. The program has listed such subjects as the workmen's compensation laws with two of the leading authorities on this subject—Dr. E. H. Lewinski-Corwin, director, Hospital Information Bureau, New York, and Dr. John A. Lapp, president, National Conference of Social Work, Chicago—both scheduled to speak upon it. Then the ever-present but yet unsolved question of what shall be done for the middle-class patient will be taken up and gone over from every possible angle. Chronic hospitals, the social worker, simplification and standardization, dietetics, out-patient departments, hospital planning, nursing and its manifold problems, hospital fire insurance, the small hospital, clinical phases of hospitals and reports of the various committees form the backbone of the program. All of these subjects will bring forth much discussion from the floor and it is a foregone conclusion that those attending the meeting will receive more benefit from these sessions than could be gained in any other way. The reports, the papers and the discussions will all be presented by leaders in the hospital field and the informal

discussion will be participated in by those people who have either found solutions to some of the ills or who have additional difficulties to present for open debate.

Monday morning will be given over to the registration and the first visit to the exhibits. The officers of the association and the chairmen of the sections as well as the committees will meet at 10:30 for a conference at the Left Central Hall. At two o'clock in the afternoon Dr. Joseph C. Doane, medical director, Philadelphia General Hospital, Philadelphia, will open the first session of the conference in Marine Hall. Clarence Baum, superintendent, Lake View Hospital, Danville, Ill., will act as secretary of the administrative section.

At this session a "clinic" will be held on "The Etiology, Diagnosis and Treatment of Chronic Hospital Ills." Dr. R. G. Brodrick, director, Alameda County Hospitals, San Leandro, Calif., will be the first ten-minute speaker on this subject, with reference to "Waste of Time." He will be followed by W. Crane Lyon, formerly superintendent, Mercer Hospital, Trenton, N. J., who will speak on the waste of material. Mary A. Foley, director of dietetics, Kahler Corporation, Rochester, Minn., will discuss the food problems of general hospitals, as will also Miss E. M. Geraghty, dietitian, Lakeside Hospital, Cleveland. Dr. J. Allen Jackson, superintendent, State Hospital for the Insane, Danville, Pa., will discuss the non-expendable supplies. All of the foregoing topics will come under the general heading of "Waste."

Paul Fesler, superintendent, State University Hospital, Oklahoma City, Okla., will speak on the "Abuse of Equip-

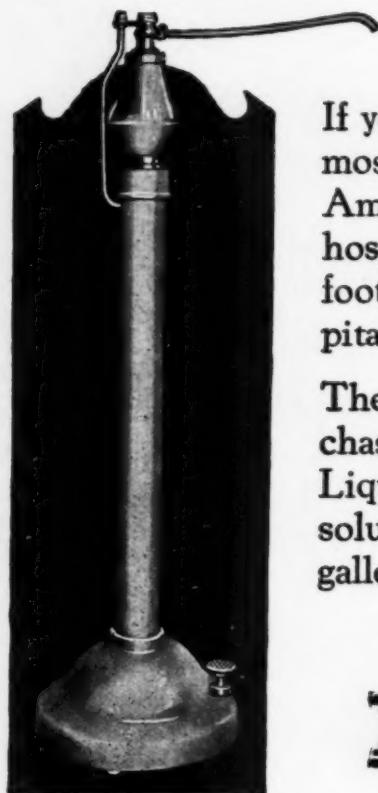

Left, Dr. R. G. Brodrick, president-elect; right, Dr. A. C. Bachmeyer, president, American Hospital Association.

CONVENTION SUPPLEMENT

31

ment;" Dr. C. G. Parnall, medical director, Rochester General Hospital, Rochester, N. Y., will speak on "Sub-Standard Morale Among Personnel;" Miss Jessie J. Turnbull, superintendent, Elizabeth Steel-Magee Hospital, Pittsburgh, Pa., will discuss "Paucity of Nurses," and these topics will be followed by a general discussion until the end of the afternoon.

Formal Opening Monday Evening

The formal opening session of the program will be held at Marine Hall, Monday evening at 8 o'clock, with Dr. A. C. Bachmeyer, superintendent, Cincinnati General Hospital, Cincinnati, president of the association, presiding. Following the invocation, Hon. A. Harry Moore, Governor of the State of New Jersey, will extend a welcome to the hospital executives which will be followed by an address of welcome by Mayor Edward W. Bader of Atlantic City. Dr. Paul Keller, superintendent, Beth Israel Hospital, Newark, N. J., and president of the New Jersey Hospital Association, will also deliver an address of welcome, as will Dr. S. F. Donohoe, president, New Jersey Medical Society, and Dr. D. W. Scanlon, president, Atlantic County Medical Society. The response will be made by Daniel D. Test, superintendent, Pennsylvania Hospital, Philadelphia, and a trustee of the American Hospital Association. This will be followed by the formal address of President Bachmeyer. This address, in full, will appear in the October issue of *THE MODERN HOSPITAL*.

Most of Tuesday will be given over to receiving and discussing the reports of the various standing committees, and to the papers of Dr. E. H. Lewinski-Corwin, and Dr.

Dr. Joseph C. Doane, medical director and superintendent, Philadelphia General Hospital, Philadelphia, chairman of the administrative sections.

John A. Lapp, on "Workmen's Compensation." The first report will be received from Richard P. Borden, senior trustee, American Hospital Association, and trustee, Union Hospital, Fall River, Mass., who will present the report of the board of trustees. Asa S. Bacon, superintendent, Presbyterian Hospital, Chicago, will present the report of the treasurer; Dr. William H. Walsh will present the report of the executive secretary; Dr. Lewis A. Sexton will report for the membership committee; Dr. John M. Peters, superintendent, Rhode Island Hospital, Providence, R. I., will report for the nominating committee, after which a recess, until 2 o'clock in the afternoon, will be taken. Dr. Bachmeyer will preside at this session.

Report of Furnishings Committee

At the afternoon administrative section, Dr. Doane will preside, and the report of the committee on general furnishings and supplies will be given by Margaret Rogers, superintendent, St. Luke's Hospital, St. Paul, Minn. This report will be discussed by A. E. Foote, Division of Simplified Practice, Department of Commerce, Washington, D. C., following which there will be a general discussion. H. J. Southmayd, director, hospital division, Commonwealth Fund, New York, will report for the committee on accounting and records, and G. W. Curtis, superintendent, Santa Barbara Cottage Hospital, Santa Barbara, Calif., will discuss the report.

What promises to be one of the most interesting subjects on the program will be the paper that will then be presented by Dr. E. H. Lewinski-Corwin, on "Workmen's Compensation," and Dr. Lapp will discuss. Both of these authorities have presented articles and editorials

Dr. Lewis A. Sexton, superintendent, Hartford Hospital, Hartford, Conn., chairman, membership committee.

The famous Battle Creek Sanitarium, equipped with Permutit Water Softening apparatus since 1920.

What Soft Water Accomplished for the Battle Creek Sanitarium

THE Battle Creek Sanitarium, Battle Creek, Michigan, with its 1200 beds and its large nurses' training school, is too well known the country over to need description. It is not generally known, however, that the water supply at this great institution is excessively hard and would ordinarily cause much discomfort to the patients as well as necessitating frequent plumbing repairs due to deposits in the piping.

For many years they were able to partially soften the water by the lime soda process, but in spite of this, considerable trouble was experienced with clogged pipes and hot water heaters which required much costly repair work.

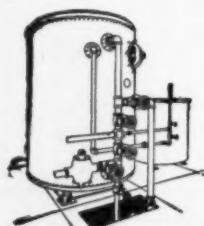

In 1920 they installed a Permutit Zeolite Water Softening Plant that removed absolutely all hardness from the entire water supply. The results astonished them.

Scale formation in boilers and pipe lines stopped immediately and boiler cleaning was completely eliminated. Labor and materials for plumbing repairs were reduced 50% and the amount of soap and scouring agents used in the laundry and throughout the buildings was cut in half. A recent letter from the chief engineer states in part:

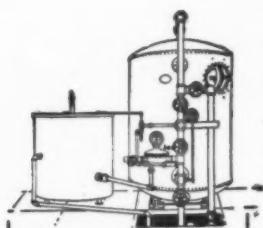

"It is difficult to say how much money soft water is saving us but it is saving us the time of one man in plumbing repairs and at least 50% of the soap used in the laundry, kitchens, etc. Besides there is considerable improvement in the appearance of the various plumbing fixtures because of the elimination of rust stains from the hard water."

It will pay you to know more about soft water. Send for a free copy of our booklet, "Reducing Costs and Improving Hospital Service with Soft Water." There is no obligation.

CONVENTION SUPPLEMENT

33

on the subject in **THE MODERN HOSPITAL** during the past year. Dr. L. J. Schmitt, University of California, San Francisco, Calif., and Cornelius S. Loder, New York, will also discuss this subject. Probably no other subject has received as much attention during the past year in state meetings as has the compensation paid hospitals for caring for injured workmen.

While the main meeting will be in session in Marine Hall, the social service section will be meeting at 2 o'clock in Left Central Hall, with Mrs. Charles W. Webb, Lakeside Hospital, Cleveland, chairman, and Lena R. Waters, Hospital of the University of Pennsylvania, Philadelphia, secretary. Dr. Doane, the first twenty-minute speaker on the program, will present the hospital executive's viewpoint of the subject, "A Basis for Mutual Understanding Between Doctors and Social Workers." He will be followed by Gertrude L. Farmer, Boston City Hospital, Boston, Mass., who will discuss the subject from the social worker's standpoint, and by Dr. John E. Jennings, who is a member of the staffs of Greenpoint and St. Catherine's Hospitals, Brooklyn, N. Y., who will express the visiting physicians' point of view.

On Tuesday evening, at Marine Hall, will be held the reception, entertainment and dance, which this year will be held in place of the usual banquet. President Bachmeyer will preside and Dr. Keller is in charge of the committee on entertainment.

On Wednesday morning, Dr. Bachmeyer will open the general session and the first speaker will be A. E. Foote, who will read a paper on "Simplification and Standardization." This will be discussed by Margaret Rogers, and a general discussion will follow. Dr. E. T. Olsen, superintendent, Englewood Hospital, Chicago, will present the report of the legislative committee, and it will be discussed by Dr. W. P. Morrill, superintendent, Columbia Hospital for Women, Washington, D. C., and others.

Dr. John A. Lapp, president, National Conference of Social Work, Chicago, who will discuss workmen's compensation.

Following this report, Dr. Malcolm T. MacEachern, associate director, American College of Surgeons, hospital activities, Chicago, will give the report of the committee on training of hospital executives, and Edward A. Fitzpatrick, dean, graduate school, Marquette University, Milwaukee, Wis., will discuss the report.

Dr. Doane will preside at the afternoon administrative section at Marine Hall, when the subject of taking care of the middle-class patients will be discussed. Much has been said lately regarding this topic, and it is a problem that confronts every administrator in the country. There will be seven ten-minute talks from seven different angles to be given in the following order: "Hospital Construction," Dr. S. S. Goldwater, director, Mt. Sinai Hospital, New York; "Hospital Administration," Dr. George F. Stephens, superintendent, Winnipeg General Hospital, Winnipeg, Man., Can.; "The Municipality," Dr. Frederic A. Washburn, superintendent, Massachusetts General Hospital, Boston; "The Board of Trustees," Dr. Ernest U. Buckman, president, board of trustees, Wilkes Barre General Hospital, Wilkes Barre, Pa.; "The Physician," Dr. Edward A. Schumann, Philadelphia General Hospital, Philadelphia; "The Patient," Dr. George H. Meeker, dean, graduate school of medicine, University of Pennsylvania, Philadelphia; and "Nursing," Major Julia C. Stimson, Army Nurses' Corps, Washington, D. C.

The Hospital Dietetic Council will also meet on Wednesday afternoon in the Casino on the second floor of the Steel Pier. Elizabeth Tuft, Wesley Memorial Hospital, Chicago, will be the chairman and Marion Peterson, Miami Valley Hospital, Dayton, Ohio, will act as secretary. The report of the committee on foods and equipment for food service, will be made by Paul H. Fesler,

Dr. William H. Walsh, executive secretary of the association.

ANESTHESIA

Quickly Mastered With A
"HEIDBRINK"

The new "Heidbrink" Model T has every practical device for the elimination of error in anesthesia administration. Chosen everywhere by expert anesthetists for its unparalleled efficiency, the "Heidbrink" is the one machine the expert or beginner can use with utmost safety and attain quick mastery.

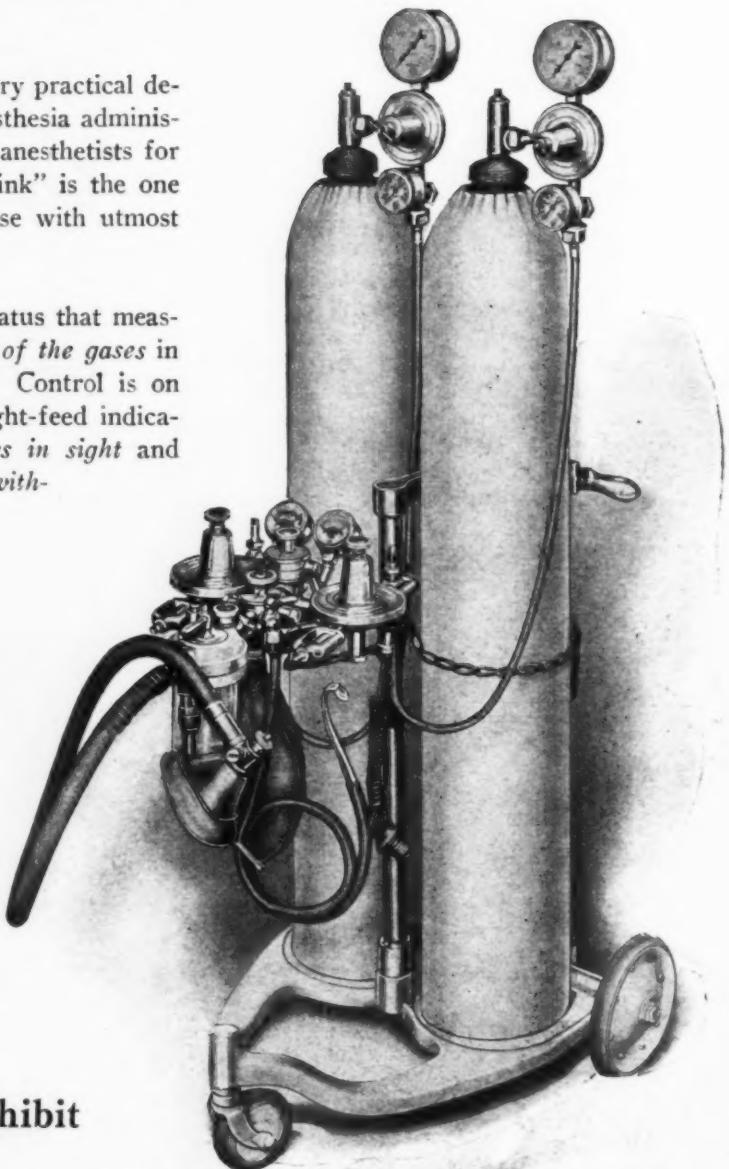

The "Heidbrink" is the only gas apparatus that measures and indicates both the *percentage of the gases* in the mixture *and the volume of flow*. Control is on top—always within easy reach—the sight-feed indication of dosage is accurate and *always in sight* and administration is always accomplished *within safe pressure limits*.

Standardized dosage for the induction (proved correct in over 100,000 cases) plainly marked on Heidbrink dials, guides the anesthetist to successful and economical anesthesia.

The "Heidbrink" Model T with its new Selective Emergency Valve is your guarantee of quick mastery of anesthesia. It will be the means of enlarging your practice in a very profitable field.

Write today for our Free Catalog 6.

CONVENTION SUPPLEMENT

35

and there will be a general discussion of this report. Dr. H. E. Barnard, American Institute of Baking, Chicago, will read a paper on "The Need for Further Nutritional Knowledge," which will be discussed by Vera Howard, Bellevue Hospital, New York. Mrs. Mary De Garmo Bryan, New York, will read a paper on "Making the Nursing Course More Practical," and this will be discussed by Helen Clark, Clifton Springs Sanitarium, Clifton Springs, N. Y.

The out-patient section will meet on Wednesday evening in Marine Hall, with Dr. John D. Spelman, superintendent, Touro Infirmary, New Orleans, La., acting as chairman and Dr. C. D. Frost, Lakeside Hospital, Cleveland, as secretary. Dr. Alec N. Thomson, secretary, Medical Society of the County of Kings, Brooklyn, N. Y., will present the report of the out-patient committee, and a general discussion will follow. Dr. Brodrick will read a paper, "Importance of the Out-Patient Department from the Point of View of the Hospital," and Dr. C. E. A. Winslow, president, American Public Health Association, New Haven, Conn., will read a paper entitled "Importance of the Out-Patient Department from the Point of View of Public Health."

President Bachmeyer will be the chairman of the general session that will be held in Marine Hall on Thursday morning. Dr. A. J. Chesley, secretary and executive officer, State Board of Health, St. Paul, Minn., will present the report of the committee on public health relations, and Dr. C. W. Munger, director, Grasslands Hospital, Valhalla, N. Y., will present the reports of the committee on county hospitals. This last report will be discussed by

Mary A. Foley, director of dietetics, Kahler Corporation, Rochester, Minn., who will discuss food waste.

Dr. Louis H. Burlingham, superintendent, Barnes Hospital, St. Louis, chairman, resolutions committee.

Cornelius S. Loder, H. J. Southmayd, Dr. Frank E. Sampson, Creston, Iowa, and Raymond G. Clapp, secretary, Welfare Federation of Cleveland, Cleveland. C. J. Cummings, superintendent, Tacoma General Hospital, Tacoma, Wash., will present the report of the committee on National Hospital Day.

The construction section, Thursday afternoon, in Marine Hall, will have Dr. George D. O'Hanlon, medical director and superintendent, Jersey City General Hospital, Jersey City, chairman, and Oliver H. Bartine, superintendent, Hospital for Joint Diseases, New York, as secretary. The report of the committee of buildings, construction, equipment and maintenance will be made by Dr. Goldwater, chairman of the committee. This year the committee has given special consideration to the subject of planning a nurses' home. Dr. A. K. Haywood, superintendent, Montreal General Hospital, Montreal, Mr. Test and Dr. Washburn will discuss the report.

The first paper of this session will be presented by H. P. Van Ardsall, of the firm of Samuel Hannaford and Sons, architects, Cincinnati. He has chosen as his subject, "Economics of Hospital Planning," and his paper will be discussed by Frank E. Chapman, director, Mt. Sinai Hospital, Cleveland. Richard Resler, architect, New York, will present the other paper of this session entitled, "Must We Develop a Distinctive Hospital Architecture?" It will be discussed by Henry C. Wright, architect, New York; Dr. Walter H. Conley, general medical superintendent, Department of Welfare, New York, and S. Chester Fazio, superintendent, Rockaway Beach Hospital, Rockaway Beach, N. Y.

SANISORB

"THE IDEAL ABSORBENT"

In the few months that Sanisorb has been on the market it has established itself as a cellulose absorbent of surpassing quality—sparkling, snow-white, and highly absorbent. Both in bulk and absorbency it goes further at lower cost than an equal weight of absorbent cotton, and the new low prices make it more economical than ever.

The fluffy snow-white rolls of Sanisorb will prove a delight to those who make up your surgical dressings and pads. It is clean and remarkably free from lint, and absorbs from three to five times as fast as absorbent cotton.

Orders for immediate delivery are shipped the same day as received without fail. On the other hand, if you desire to have the benefit of quantity prices you may have shipments divided over a three months' period.

CONVENIENCE

Each roll of Sanisorb is put up in a strong fibre shipping container with reinforced ends, eliminating the ordinary paper wrappings, which so easily tear and expose the contents to soil and damage. Each container is marked with the gross weight, weight of the container itself, and the net weight of Sanisorb. Rolls of Sanisorb vary from fifteen to seventeen pounds, net weight.

PRICES ON SANISORB ARE AS FOLLOWS:

100 LB. LOTS, PER POUND.....	23c
500 LB. LOTS, PER POUND.....	22c
1000 LB. LOTS, PER POUND.....	21c

FREIGHT PAID

The above prices apply to Zone 2 which includes all states east of the Mississippi River, and Minnesota, Iowa, and Missouri. Zone 3, west of the Mississippi River and east of the Rocky Mts. add 1c per pound. Zone 4, including all states in the Rocky Mts. and west thereof, add 3c per pound. In less than 100 pound lots Sanisorb is 28c per pound, f. o. b. Milwaukee. It is also supplied in rolls averaging two pounds at 3c per pound higher than the above prices.

IN BOOTH NO. 244 AT THE CONVENTION

Besides Sanisorb we will show a complete line of hospital supplies and garments.

In the Casino on Thursday afternoon, will be held the nursing section at which Grace E. Allison, Samaritan Hospital, Troy, N. Y., will preside, and Evelyn Wood, Central Council for Nursing Education, Chicago, will be secretary. A series of fifteen minute papers will be presented and discussed. The first paper, "The Grading of Schools of Nursing," will be presented by Dr. William Darrach, Committee on the Grading of Nursing schools, New York. This will be followed by a paper by Dr. May Ayres Burgess, director of study, Committee on the Grading of Nursing Schools, New York. She will take as her topic, "Problems Involved in the Grading Program." Both papers will then be open to general discussion.

Frances B. Latimer, Committee on Nursing Education, Cleveland, will read a paper, "The Attitude of the High School Girl Toward Nursing," and Major Julia C. Stimson will open the discussion. "The Application of the Case Method of Teaching Nursing," is the title of the paper that will be read by Effie Taylor, associate professor and superintendent of nurses, Yale University School of Nursing, New Haven, Conn. This paper will be discussed from the standpoint of the municipal hospital by Marion Rottman, director of the nursing service and principal of the school of nursing, Bellevue and Allied Hospitals, New York, and by Margaret Ashman, superintendent of nurses, Orange Memorial Hospital, Orange, N. J., who will discuss the paper from the standpoint of the small hospital.

Interesting Topics on Trustees Program

Excellent subjects are on the program for discussion at the trustee section, to be held Thursday evening at Left Central Hall. Frank B. Shaw, president, board of trustees, Presbyterian Hospital, Chicago, will preside, and the round table questions will deal with the following subjects: "Hospital Fire Insurance," "Relationship of the Nurses' Training School to the Hospital," "Is It Justifiable to Meet the Cost of Workmen's Compensation Cases from Trust Funds?" "Responsibility of Trustees for the Acts of Their Agents," and other topics. The following trustees have been assigned to these subjects: Ingersoll Bowditch, Boston, Mass.; Col. C. S. Walker, Iowa Methodist Hospital, Des Moines, Iowa; P. B. Sheriff, Broadlawns-Polk County Hospital, Des Moines, Iowa; and Henry E. Meeker, St. Mark's Hospital, New York City.

In the Casino, on Thursday evening, will also be the small hospital section meeting. Mary E. Yager, superintendent, Maternity and Children's Hospital, Toledo, Ohio, will be chairman, and the first paper will be read by Frank E. Chapman, on the subject, "The Small Hospital—Its Organization and Community Relation." Following this paper and the discussion of it, will be a round table with the following topics listed: "Staff Procedure and Its Relation to the Board of Trustees and Superintendent;" "Accounting and Credit Department;" "Social Service Department;" "X-Ray and Laboratory Department;" "Mechanical Department;" "Pharmacy;" "Dietary Department;" "Laundry and Housekeeping Department."

Ethylene Gas to Be Discussed

Friday morning President Bachmeyer will preside at the general session to be held at Marine Hall. The report of the committee on clinical and scientific equipment and work will be presented by Dr. K. H. Van Norman, director, Lakeside Hospital, Cleveland, and three points under this report will be discussed. "Ethylene Gas Anesthesia With a View to Recommendation, With Particular Reference to Its Explosiveness," will be the first; "Operating Room Equipment for a 100-Bed Hospital" the second, and the

last will be "Electrocardiography—Considered from the Following Standpoints—type of apparatus, location, wiring, special hours for operation, operator, charges made, methods of keeping records and popularity with the staff."

Dr. Norman E. Titus, vice-president, American Electro-therapeutic Association, New York, will read a paper on "What Is Physical Therapy?" and it will be discussed by Dr. F. B. Granger, Boston City Hospital, Boston. Dr. A. Bern Hirsch, New York, will read a paper entitled "Physiotherapy Department Personnel from the Hospital Administration Standpoint," and it will be discussed by Dr. William Benham Snow, New York.

Closing Session Friday Afternoon

The final session will be held on Friday afternoon in Marine Hall, when Richard P. Borden will report for the committee on constitution and rules, Dr. Louis H. Burlingham, superintendent, Barnes Hospital, St. Louis, Mo., will report for the resolutions committee and Dr. Winford

Dr. John M. Peters, superintendent, Rhode Island Hospital, Providence, chairman of the nominating committee.

H. Smith, director, Johns Hopkins Hospital, Baltimore, Md., will report for the committee on the Smithsonian Institution exhibit. His report will be discussed by Mr. Borden and Mr. Test.

The new president will then take the chair and the committee appointments for the ensuing year will be announced.

The local reception committee is composed of Governor A. Harry Moore, honorary chairman; Commissioner William J. Ellis, chairman; Dr. George D. O'Hanlon, Dr. Henry A. Cotton, Mayor Edward L. Bader, and Dr. Andrew F. McBride. The entertainment committee is composed of Dr. Joseph R. Morrow, chairman; Dr. Guy Payne, Dr. Paul Keller, and Dr. Samuel L. Salasin.

Investigate
Quiet
 Booths 95-96
**American
 Hospital
 Convention**

At last year's convention many visitors found much to interest them at the Johns-Manville Acoustical Treatment Booth shown above.

IN BOOTH 95 and 96 at the Hospital Convention at Atlantic City, we will explain the basic principles of the Johns-Manville Acoustical Treatment which has brought quiet to so many hospitals in America.

In all the hospitals where this treatment has been used, it has been heartily endorsed. It substantially aids the recovery of patients and increases the efficiency of the personnel.

Do not fail to investigate.

WHERE TO GO AND WHAT TO DO IN ATLANTIC CITY

HERE are two things that the hospital executive will do immediately when he comes to Atlantic City on September 27. His steps will naturally lead him first toward the Steel Pier where the exhibits and sessions of the American Hospital Association will be held. Here he will visit the booths housing the different educational exhibits and at the end of the pier the general meetings of the association.

Outside the pier Atlantic City unfolds many wonders and many sights that are well worth seeing and it is to these places that the visitor will wish to go in his spare moments.

Besides being a year round resort that is visited annually by twelve million people, Atlantic City is a municipality of 100,000 population, with all of the progressive features of a city of similar size. Its golf courses are exceptional and have been the Mecca for eastern golfers for many years. Its business section is an active center of commerce and its civic improvements are on a par with cities considerably larger.

Nature has been extremely generous with this community in the disbursement of sunshine and healthy weather and the community itself has seen to it that every precaution is taken to guard the health of its citizens and visitors.

Among the attractions of the Boardwalk are the piers. Some of them are purely for amusement, such as the Steeplechase Pier, which has the usual freak attractions and various rides to be found at summer resorts in other cities. Then there is the Steel Pier and the Million Dollar Pier that have various meetings, conventions and other attractions during the summer months. The Garden Pier has several permanent exhibits and a theater, the Central Pier has solely permanent exhibits, shops and offices, and the Heinz Pier houses a permanent exhibit.

Along the Boardwalk at various intervals are found little houses with chairs and benches. These are provided by the bathing house proprietors but are for public

use and are a popular congregating place for visitors.

The Boardwalk lines the beach front where the bathers frolic until late fall. Here the life guards are kept on duty until late in the month of October and bathing is usually enjoyed during the latter part of September. It is interesting to note in this connection that during the past fifty-one years the average temperature for September at Atlantic City has not fallen below 63° F. and has been as high as 72° F. This is ideal bathing weather, providing there is no rainfall on these last few days of September. From the weather report of the years 1921, 1922, 1923 and 1924 the last four days of September have had the least amount of rainfall of any of the days of the month, with the temperature staying above the average in each case.

It is reasonably safe, therefore, to believe that there will be but little rain and that bathing will be enjoyed, although not even the weather man will guarantee.

Sea Bathing Facilities

There are many bathing pavilions along the beach front and the charge for bath houses and lockers is reasonable, in fact more reasonable than at most resorts on the Atlantic seacoast. Many of the hotels allow bathing from the rooms, which is convenient, provided you bring your own bathing suit. The city is fairly liberal in its attitude toward bathing costumes. The best beaches are usually those that are most crowded but this does not make the pleasure any more keen. The crowds seem to congregate at about the center of the beach on either side of the Central Pier or from the Steel Pier to the Million Dollar Pier, and there is less congestion for parties outside these areas. Bathers in costume are not allowed on the Boardwalk. Beach shades may be rented as well as beach chairs.

One of the sights at Atlantic City is the Absecon light-house, which is 167 feet high and is open for inspection during the day. It is at the extreme end of the Boardwalk.

"U.S." TILE FLOORING

A view of Chalfonte-Haddon Hall from the beach.

On rainy or unpleasant days the ardent swimmer can be found in any one of the swimming pools. The Ambassador Hotel has one, the Royal Palace Hotel has another and the third is located at the Boardwalk and Rhode Island Avenue and is called the Hygiea bathing pool. All three are popular with the bathers and are well patronized.

Crabbing and fishing parties are arranged daily. These parties leave the yacht wharves and a pleasant day watching the deep sea fishing and participating in it too, if one chooses, can be had. The big boats go some distance out for the haul and return when the nets are filled.

Three Courses for Golf Players

For the golf players there are three courses. Northfield, the Atlantic City Club, is open to those obtaining tickets from hotel members and the Linwood Club extends a similar courtesy. The Seaview course is strictly private with admission only by card from members. All three courses are excellent, with Seaview leading in point of notable players and visitors.

The green fee on all three of the courses is \$3. Northfield and Linwood are reached by the "Short Fast Line," the electric interurban railway, and the Seaview Club is located at Absecon Heights.

Those people who are interested in fraternal orders and business clubs will not want for friends in Atlantic City. The following civic clubs and their meetings are listed:

Civitan Club, Wednesday, 12:30 p. m., Ambassador Hotel.

Exchange Club, Friday, 12 m., Knickerbocker Hotel.

Kiwanis Club, Thursday, 12:30 p. m., La Victoire Restaurant.

Lions Club, Wednesday, 12:45 p. m., Hotel Breakers.

Rotary Club, Tuesday, 12:30 p. m., Ritz-Carlton.

Some of the more prominent lodges are listed below in alphabetical order:

Atlantic City Shrine Club, Ambassador Hotel.

Atlantic City Turn Verein, 24 South New York Avenue.

Elks, 124 South Virginia Avenue.

Eagles, 26 South Michigan Avenue.

Eastern Star, 716 Atlantic Avenue.

Foresters, 23 South Michigan Avenue.

Knights of Columbus, St. James and Pacific Avenues.

Knights of Pythias, I. O. O. F. Hall.

Masonic Temple, 425 Pennsylvania Avenue.

Moose, 716 Atlantic Avenue.

Odd Fellows, 125 New York Avenue.

Order Brith Abraham, Atlantic and Tennessee Avenues.

Red Man, Michigan and Atlantic Avenues.

Atlantic City has 1,200 hotels some of them the finest appointed in the world and while the Boardwalk hotels are perhaps the more popular those who will seek quarters in the "side street" hotels will not be disappointed, provided they choose with care. This does not mean that

CAPES

FOR

September Training Classes

It is no longer a question of whether or not to equip nurses with capes. Hospitals have decided long ago that capes are a necessity. The question now is—which capes to buy. But those who know Standard-ized Capes are not troubled with this question.

Standard-ized Capes are designed with three distinct objects in mind. First—**Protection** of the nurse's health against cold, wet, changeable weather in her trips between buildings, thereby maintaining her efficiency. Second—**Beauty** that enhances the appearance of the nurses and lends prestige and dignity to the institution. Third—**Durability** of service.

To accomplish these objectives, Standard-ized Capes are very carefully tailored of high grade woolens and in distinctive styles that create an atmosphere of discipline and beauty about the institution.

**When you buy Standard-ized Capes
you buy from the manufacturer direct
—which means LOW PRICES.**

Standard-ized Capes are made in any length, with military or storm collar; institutional initials embroidered on collar without charge; wide range of color combinations.

**We'll gladly send any institution a Standard-ized
Cape on approval.**

Finger Tip Length
Cape

Three-quarter Length
Cape

COATS

Tailored to individual measure in imported and domestic all wool materials. Neat and distinctive styles. Made to withstand hard wear.

SWEATER COATS

Made of fine, light weight, warm woolens, black and navy. Can be worn tuxedo style or shawl collar effect. Ideal for hikes, sports and utility use.

A complete display of Standard-ized Apparel for nurses with complete information will be found at the
AMERICAN HOSPITAL ASSOCIATION CONVENTION

CLEVELAND, OHIO

all of them are good. There are many worthless hostelleries here as well as in every other city, but it does mean that excellent accommodations may be obtained in hotels at this resort and at a fairly reasonable price, if care is exercised in choosing.

Rates, of course, vary according to location and the elaborateness of the hotel. Many of the hotels are conducted on the American plan only and here the charge will be from as low as \$3.50 a day for one person up to \$22 a day for two persons. The proper charge on the American plan should be about \$6 a day for one person in a room without a bath and \$9 a day with bath. A charge of \$14 a day for a double room with bath is reasonable.

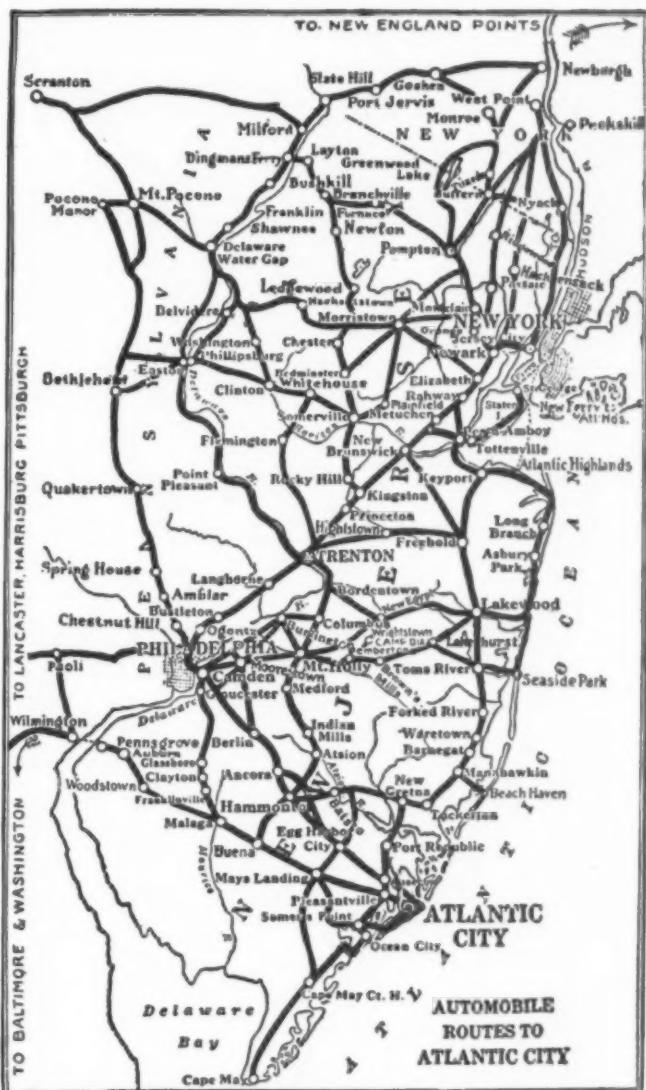

Hotels conducted on the European plan charge for room and bath from \$3 to \$21 a day and excellent accommodations may be obtained at from \$5 to \$7 a day.

Hotels Within Walking Distance

While some of the hotels are located a distance of a mile or more from the Steel Pier the distance does not seem great, as walking is a popular diversion at this resort. Every morning after six the Boardwalk commences to be populated with the strollers and this keeps up until well after midnight. Walking seems easy here but if there are those who prefer riding there is always handy a wheel chair (there are 2,500 of these operated in Atlantic City) that will carry you anywhere on the walk. The charge for wheel chairs is \$1 an hour for two persons and \$1.25 for three. The chairs, however, are not built to hold comfortably more than two medium size adults and a child.

If neither the walking or the wheel chair appeals, the visitor can resort to "jitneys" on Pacific Avenue or the ever-ready taxicab. These last two modes of transportation, however, cannot come onto the Boardwalk.

Along the Boardwalk are a variety of shops, some of them worthy of patronage but many of them—especially the auction houses, real estate and stock selling offices—are to be dealt with only after thorough investigation and the most extreme caution. It is natural that this resort should have an influx of frauds and it hardly seems

Guide for those who may be planning on motoring to Atlantic City.

necessary to warn hospital people against them. There are few bargains at the auctions and no profitable investments at the gaudy and ornate realty emporiums.

Those who wish the newspapers from their own city will not have a hard time finding them. Many of the hotel news stands carry a good selection and there are several places where they can be obtained but at a five and sometimes ten cent advance in price. For instance, New York Sunday papers sell for fifteen cents instead of five cents. Many newspapers are also to be found at the Atlantic City Public Library, corner of Pacific and Illinois Avenues.

Atlantic City Has Twenty-one Theaters

Atlantic City has twenty-one theaters most of which are moving picture theaters. There are, however, several theaters presenting dramatic productions and they are located on the Boardwalk. It has become the custom in recent years to try out dramatic and musical comedy productions at Atlantic City before the more formal opening in New York City. The charges are about the same as for the theaters of New York, Philadelphia, Chicago and other cities where these productions will later appear. On Sunday evenings some of these theaters have vaudeville programs in place of the regular productions.

**EVERY PATIENT
NEEDS MENTAL RECREATION AND THUS
ENJOYS READING**

With
THIS NEW INVENTION

DR. FARRINGTON'S PORTABLE READING TABLE FOR THE LAP

ADJUSTABLE to Over 2000 Positions

Size 12x18, folds to 1 inch. Extends to 15 in., height. Weight about 3 pounds.

Light, handy, portable, collapsible and adjustable. No skill required to use it.

Supports books, magazines, manuscripts, typewriter, writing materials, sewing, fancy work, etc., at just the right distance from eyes and at the scientifically correct angle to line of vision. Thus the reader is permitted to maintain correct bodily posture.

Made of three-ply laminated seasoned woods. All metal parts of steel, nickel plated.

Style 1 Natural Wood Finish, \$6.50.

Style 2 Walnut Finish, \$7.50.

Style 3 Mahogany Finish, \$7.50.

Style 4 White Enamel (Hospital Finish), \$8.50.

Style 5 Walnut, \$9.50.

Style 6 Mahogany, \$9.50.

Prepaid to any address in U. S. A.

**PATIENTS—DOCTORS—NURSES—INTERNS—ALL ENJOY THE FARRINGTON
and Highly Recommend It**

NATURE DEMAND'S ITS USE

Mrs. J. F. Brady, mother of 17-year-old afflicted son, writes—
"For years I have been looking for something to correct faulty position of Infantile Paralysis case while reading, eating, or studying. This need has been met in the Farrington."

Dr. S. A. Fuqua writes—"For years I have looked for some device which would hold heavy medical books in comfortable position. The Farrington fills the bill perfectly with no strain on muscles of arms and eyes."

**ONE SIZE FITS ALL—OLD,
YOUNG, LARGE, SMALL**

THE EYES OF THE WORLD NEED IT

W. S. Bovard says—"It appealed to me at first glimpse. I have so often wanted just such a reinforcement for my anatomy. The inventor hit upon a real benefaction."

Dr. C. W. Trail, says—"When I am not using the Farrington, my wife is using it, when my wife is not, our eight-year-old daughter is using it. So you see, it has a prominent place in our home. I would say that every home should have at least one Farring on Lay Table."

Packs Easily into Suitcase for Travelling

EVERY CHILD NEEDS IT

**MAKES AN IDEAL GIFT
FOR THE SICK**

**A NEW JOY
IN LIFE**

Prof. Eaton of Wis. State University writes—"I have been using this wonderful invention daily since receiving it. It is a joy now to read a book of any size, resting easily in my rocking chair. Thousands will now have a new joy in reading while resting."

A portion of the immense beach that lines the city looking toward the Boardwalk and some of Atlantic City's large hotels.

ciation meeting will drive their automobiles to Atlantic City and for their convenience we are listing the traffic rules and regulations herewith:

Traffic Regulations

Light Signal System—On Atlantic Avenue, Boston to New Hampshire Avenue; Pacific Avenue, Hartford to New Hampshire Avenue; Arctic Avenue, Boston to New Hampshire. Green light means proceed; Red, stop; Amber, all traffic stops except pedestrians. In case of fire, amber light flashes while apparatus is on street.

Turns—Left hand turns must be made by driving to right hand curb before turning. On light controlled streets, turns are made when top light is lit. Right hand turns are always open, except on amber light. "U" turns on light controlled streets can be made only at street intersections.

Parking—Look for parking direction signs. "No parking" signs and marked areas must be observed. No parking is allowed near Boardwalk approaches, fire plugs, theaters or public building entrances, or 75 feet from any corner or opposite a building operation.

Time Limits for Parking are observed as follows: Two hours between 9 a. m. and 6 p. m. on Atlantic Avenue between Maine and Texas and on cross streets from Maine to Texas between Atlantic and the Boardwalk. In same district from 6 p. m. to 9 a. m., three hours; Pacific Avenue, 10 a. m. to 5 p. m., 30 minutes.

Place and Angle of Parking are fixed as follows: On cross streets between Maine and Texas and from Atlantic to Pacific, parallel with and six inches from curb on east side only, facing north (away from beach). **Exception:** On North Carolina and Pennsylvania Avenues, parking is allowed between Pacific and Atlantic on both sides of street, on Tennessee, westerly side only.

On cross streets between Pacific and Boardwalk, parallel with and six inches from the curb on east only, facing away from the Boardwalk. **Exceptions:** States Avenue, Pennsylvania and North Carolina Avenues are marked for center street parking.

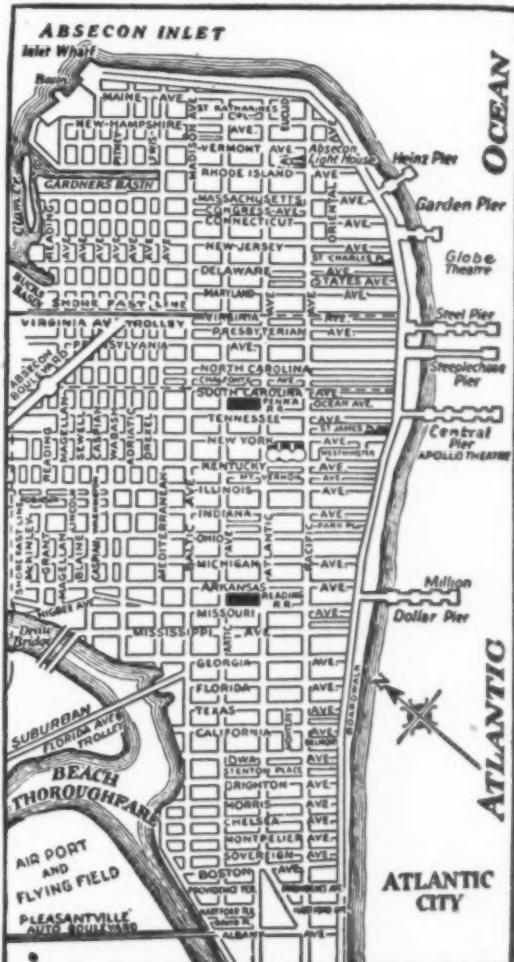

On Atlantic Avenue at 25 degree angle only.

One-Way Streets—Tennessee Avenue one way from Atlantic to Pacific; South Carolina one way from Pacific to Atlantic. Other narrow streets in center of city are marked.

Safety Islands—Driving is allowed to right of islands only. No traffic between island and center of street.

One has to be careful in choosing a garage at this place and a definite understanding should be made with the garage keeper before the car is placed in his keeping. It is the custom in most garages to fill the place as full

of cars as possible and after this is done to store the cars along the side of the streets and in adjacent alleys and vacant lots. If you are starting out early in the morning there will be a delay of close to an hour in getting your car out unless you have left specific instructions the night before. Even the garage keepers cannot be relied upon at this resort. It is one of the annoyances of

Map of Atlantic City showing the layout of streets.

The cooperation of Hospital and Manufacturer created this new service

Our Booths at the A. H. A. Convention are
241, 242

A lack of dressings in crucial moments. Nurses' time wasted in dreary, non-professional duties. Lack of uniformity. Waste. Annoying and serious problems encountered by hospitals in the making of finished dressings from bolt gauze.

• • •

THE manufacturer faced the problem, —to find some means to save the hospital this extra expense, labor and material. Experiments were performed—machines planned. Finally his efforts succeeded.

The result was Curity Gauze in two new forms—Ready-Cut and Dressing Rolls. A new service, yet one arising logically from the close cooperation between hospitals and the manufacturer. The two new forms have met with immediate and gratifying enthusiasm.

Curity Ready-Cut Gauze is the well-known Curity product cut into the most commonly used shapes and sizes for all dressings. These various sizes can be made into gauze dressings, sponges, flats, strips, tapes, walling-off sponges, etc. Folded around cotton or Cellucotton—they can be made into pads for all types of work. They are easy to dispense and always available in usual form. Waste is completely eliminated.

Curity Dressing Rolls are rolls of Curity Gauze, specially folded (in three sizes) so

that the longitudinal folding is done. Just cut the desired length from a Dressing Roll, tuck in the ends, and the completed dressing is ready. Curity Dressing Rolls will make gauze dressings of almost any size desired. An efficient, practical standard, upon which Dressing Rolls can be placed for cutting, is free to every user.

Greater Economy

TWO sizes of Dressing Rolls cost *exactly the same* as gauze in bolts. The other, as well as Ready-Cut Gauze, costs only a few cents more per hundred yards. In net cost, when savings in time, labor, and material are figured, both new forms are *far more economical than bolts*.

Curity Gauze may still be had in bolt form. However, we urge that every hospital see and try the new forms. The coupon, with its generous trial samples, is so simple to mail and may mean so much towards less expensive and more practical dressings practice.

the place and therefore every precaution must be taken in order to receive any sort of service. The charges are likewise out of proportion.

Roads leading to and from Atlantic City are excellent, especially the road from Philadelphia. The Shore road to New York is nearly as good and time will be saved by turning at Perth Amboy, taking the ferry to Staten Island, crossing this area and then taking the ferry into New York City. This route is less congested and tourists thereby escape the traffic of Elizabeth and Newark, N. J.

New Jersey has few speed traps marked as such, but this state does foster a volunteer constabulary system which is to be heeded. Many proprietors of gas filling stations along the road are members of this voluntary organization and they will give chase to the speeding motorist.

Railroad Service Good

Railroad train service out of Atlantic City is fairly frequent and the trains are well equipped as would be supposed for a resort of this character. Pullman cars are on practically all except the excursion trains and the speed made by this manner of transportation is good. The city is served by the Pennsylvania Railroad and the Philadelphia and Reading Railroad with stations a few blocks from the hotels and the Boardwalk. The Pennsylvania operates two types of trains, namely, steam and electric. The steam trains leave from South Carolina and Atlantic Avenues while the electric trains leave from Tennessee and Atlantic Avenues. The electric trains go to Philadelphia, Millville and Vineland, while the steam trains connect with the main line at Philadelphia and Trenton, N. J. The Reading Railroad station is located at Arkansas, Atlantic and Missouri Avenues, and takes passengers for New York and Philadelphia.

Another and popular mode of transportation is the busses that run to Philadelphia, New York and all points in New Jersey. A bus leaves each morning for Asbury Park, departing from the Fredonia Hotel on Tennessee Avenue near the beach. Busses leave frequently for Absecon.

Where Busses Leave

Busses for Philadelphia leave from the Iroquois Hotel, South Carolina Avenue near the beach; the Million Dollar Pier; the Strand Hotel, the New Clarion Hotel and the DeVille Hotel and on such a schedule that it is possible to catch one of them every hour.

Busses for New York leave from the DeVille Hotel, Kentucky Avenue, near the beach; the Iroquois Hotel, South Carolina Avenue, near the beach; and the Strand Hotel, Pennsylvania Avenue. The first leaves at 11 a. m., and the last two leave at 2 and 3:30 p. m., respectively.

Philadelphia is sixty miles from Atlantic City and the trains are scheduled to make the trip in one hour. It is no breach of confidence to state that most Atlantic City trains are late in arriving, but this may not be the case during September when the excursionists are not numerous.

The Children's Seashore—House for Invalid Children.

New York is 143 miles, and the trains are scheduled to three hours, arriving either at the Pennsylvania Terminal or downtown, New York. The busses cannot duplicate this time but the roads are good and the trip is usually an enjoyable one. The bus fare is \$1.50 to Philadelphia, \$2 to Lakewood, N. J., and \$4 to New York City. By railroad the fare to New York City is \$4.93.

The Atlantic City post office is located at Pennsylvania and Pacific Avenues, one block from the Steel Pier. The air mail schedule from Atlantic City for New York to Chicago is as follows:

Letters are received until 1:15 p. m., and will arrive in Chicago at 5:45 a. m. the following morning. Mail for San Francisco by air mail is received until 7:50 p. m., and arrives the next evening in San Francisco at 5 p. m. Boxes for this service are located on the Boardwalk at South Carolina Avenue and Virginia Avenue.

Good Telegraph Service Assured

Branches of both telegraph services are to be found in all of the leading hotels, and there is always extra service to conventions with frequent calls by the messenger boys to the meeting halls and regular deliveries of telegrams to the information booth.

The Presbyterian, Methodist Episcopal and Methodist Protestant, Baptist, Congregational, Episcopal, Lutheran, Society of Friends, Jewish and Catholic religions are all represented at Atlantic City. The First Baptist Church is located on Pacific Avenue between Pennsylvania and North Carolina Avenues; St. Nicholas Catholic Church is located at Pacific and Tennessee Avenues; the Congregational Church is at Victoria and Ventnor Avenues; St. James' Episcopal Church at Pacific and North Carolina Avenues; The Friends' Meeting House at Pacific and South Carolina Avenues; Rodef Sholem Synagogue at Pacific and Arkansas Avenues; St. Andrews by-the-Sea Lutheran Church at Pacific and Michigan Avenues; the Central Methodist Episcopal Church at Pacific and South Carolina Avenues; Christ Methodist Protestant Church at Pacific and Belmont Avenues; the First Presbyterian Church at Pacific and Pennsylvania Avenues. Nearly all of these churches are only one block from the Boardwalk on Pacific Avenue.

For the return trip following the convention it would be well to arrange for Pullman accommodations upon arrival.

Philadelphia, Pa.

PHILADELPHIA EXTENDS WELCOME TO VISITORS EN ROUTE TO CONVENTION

EN ROUTE to the Atlantic City convention hospital people will be given an opportunity to spend a few days in historic old Philadelphia. Famed the world over as the birthplace of American Liberty, the home of the Liberty Bell, the Betsy Ross house, Christ Church, the first medical college, and the first hospital, Philadelphia will hold a lure that will be as irresistible as its welcome will be genuine.

After a day or two spent at the Sesquicentennial Exposition (which covers all of one thousand acres in the most southerly portion of Philadelphia), not a few delegates will, no doubt, wish to visit some of the city's hospitals. There visitors will find a welcome which will at once reflect the Philadelphia Hospital Association's policy of unstinted hospitality to all visiting, institutional workers. Inquiries by telephone or in person at the office of May Middleton, business manager, Methodist Episcopal Hospital, Philadelphia, secretary of this association, as to special features of institutions to be visited, will be gladly and promptly answered. Information of all kinds will be given here.

From both the standpoint of historic interest and modern scientific development the hospitals of Philadelphia will be of especial interest to all who avail themselves of the Philadelphia Hospital Association's invitation. As the third city in size in the country, Philadelphia may boast of its hospital facilities, which approximate 12,000 beds in general medical, surgical, maternity, orthopedic, tuberculosis and contagious hospitals, exclusive of facilities for mental diseases.

If for no other than its historical interest the Pennsylvania Hospital will be well worth visiting. It is the oldest hospital in the United States, having been founded in 1751 by an act of the provincial assembly "to encourage the establishment of a hospital for the relief of the sick poor of this province and for the reception and care of lunatics." Benjamin Franklin figures prominently in the founding of the hospital although he gave his friend, Dr. Thomas Bond, "a prominent physician of large practice in Philadelphia," the credit for originating the idea. Franklin was the first secretary or "clerk" and the second president of the corporation.

In connection with its founding the act established a corporation called "The Contributors of the Pennsylvania Hospital," the name of the present corporation. By contributing the sum of ten pounds sterling at one time, a person became a contributor to the hospital and a voting member of the corporation. This amount was later changed to \$30 which is now the sum required to become a contributor.

The hospital is located at Eighth and Spruce and Ninth and Pine streets and is now an institution of 318 beds. It will be interesting to note the cornerstone, laid in

1755, in the east wing of the present building, which contains an inscription written by Franklin. The original plans called for a central building of three stories with an east and west wing and terminal wings extending north and south, surmounted by cupolas. The east wing was completed in 1756 and by 1796 the entire plans had been carried out in the structure. This wing now houses the medical part of the hospital and was recently enlarged by an open air porch which has afforded needed facilities for the care of pneumonia cases and convalescents. The new addition is a feature worth visiting.

In 1829, in order to relieve the congestion from lack of space, the mental patients were taken from the hospital and housed in what is now the Department for Mental and Nervous Diseases of the Pennsylvania, located at Forty-fourth and Market streets. Separate departments for men and for women were also created at this time. In connection with the men's department is the large farm at Newton Square, known as "Ashley." After the segregation of the mental patients the

original building was used entirely for general and accident cases. Additions have been made to the buildings so that at present the hospital occupies the entire block with a dispensary and two nurses' homes outside the premises. In enlarging the hospital great care has been taken not to destroy the architecture of the original building.

During the 174 years of its history the hospital has been supported almost entirely by private contributions and bequests and has not received state or municipal aid for over a century and a half. Throughout this time it has taken care of a comparatively large percentage of free patients and according to Daniel D. Test, superintendent, the institution still holds to its tradition of never turning away a patient because he cannot pay for his treatment.

The hospital has a large and valuable medical library which for many years was the only one of its kind in the city. In this library will be found many old and rare books that are of interest to the student of medicine who desires first-hand information.

The Pennsylvania Hospital is affiliated with the Philadelphia Dispensary which was organized in 1786.

From the standpoint of size, the Philadelphia General Hospital holds the premier place among the hospitals of the city, with a capacity of 1,800 beds, exclusive of the Philadelphia Hospital for Mental Diseases which contains 3,000 beds. All other types of cases, except contagious diseases for which the city has provided a separate institution, are at all times treated at Philadelphia General Hospital.

One of the special features of interest to the visitor is the new laboratory building which cost over a quarter of a million dollars and contains every modern facility for

Front entrance, Central pavilion, Pennsylvania Hospital.

Whenever You're in New York—

IT WILL be my pleasure—and a genuine one
—to personally welcome you to the
McAlpin—New York's most popular Hotel.

You won't need the KEYS TO THE CITY—the McAlpin is right in the heart of New York—the "Centre of Convenience". A block from Pennsylvania Station—five minutes from Wall Street—across the street from the biggest Department Stores—a short block from Fifth Avenue and the World's smartest shops and as for the theatres, the McAlpin marks the spot "Where the White Way Begins".

The finest of accommodations—from a cheerful, comfortable room at \$3.50 per day to the luxury of a suite at \$30.00 per day, the best cuisine, dancing to the strains of Ernie Golden's famous orchestra—in short, the McAlpin affords everything New York affords—at a price you can afford. And of course, McAlpin service—the prompt, courteous, friendly service that makes every McAlpin guest contented and happy.

May I soon have the pleasure of greeting you?

Arthur S. Leg.
Managing Director.

HOTEL McALPIN

P.S.:—By the way, if you attend the American Hospital Association meeting at Atlantic City, you'll probably visit New York. That will be our opportunity to fulfill our promise of perfect hospitality.—A. L. L.

the medical and allied research. The radium and deep therapy departments are also of interest. The radium department consists of an emanation plant with modern vacuum apparatus, research and other work rooms with precision lathe and milling machine for accurate instrument construction. The deep therapy department has a modern high voltage x-ray machine that will be of especial interest to executives interested in this type of equipment.

Those interested in out-patient service will have an unusual opportunity of visiting the out-patient department, which is one of the most completely developed services of this type in the country. A wide variety of clinic service such as heart, prenatal, neuropsychiatric, genito-urinary, tuberculosis and radiologic, is offered.

Another new feature that will be of interest to visitors is the new resident physicians' home which houses the intern staff of the hospital. The nurses' home, constructed in 1918, which contains a dining room that seats 300, separate bedrooms, a gymnasium and swimming pool will also be of interest. A cordial invitation to visit all departments and every type of work done at the hospital has been extended by Dr. Joseph C. Doane, medical director and superintendent.

Hahnemann Hospital, a general hospital of 409 beds, is one of the most centrally located of the Philadelphia hospitals, since it is within three blocks of the City Hall and Broad Street Station. It is of especial interest as the teaching hospital of the Hahnemann Medical College and because of its efficient record system for out-patients. This hospital is also proud of its dietary and social service departments and its infant welfare work and John M. Smith, director, invites everyone who wishes to visit

A view of the Methodist Episcopal Hospital.

these departments. It is the third oldest hospital in the city, having been built in 1852 on another site. Its enlarged quarters and modern developments have made it one of the best equipped hospitals of the city.

The Lankenau Hospital, originally the old German Hospital of the city, is located at Corinthia and Girard avenues and is affiliated with the postgraduate school of the University of Pennsylvania. It is a six-story general hospital with a separate building for its maternity department and a home for student nurses directly opposite.

This hospital has gained a wide reputation for its follow-up system, which will be of particular interest to executives who are anxious to observe the working out of a practical, efficient system. The dietary department, which is also well developed and the method of manufacturing soap by cold process from fats, which is employed by this hospital, are features of interest to the visitor.

The Presbyterian Hospital in Philadelphia, located at 51 North Thirty-ninth street, a general hospital under the care of the synod of Pennsylvania, has a capacity of 269 beds. Of particular interest to visitors is the new

laboratory and dispensary building which is recognized as one of the outstanding buildings of this type in the country. The hospital has gained distinction because of its admission system for dispensary patients, its record system and its school of nursing organization. Charles S. Pitcher, who is a member of the faculty of Temple University in charge of the courses in hospital administration, is superintendent of the hospital.

Connected with the University of Pennsylvania is the Hospital of the University of Pennsylvania at 3400 Spruce street. This hospital, which has a capacity of 562 beds, extends two city blocks. It has sixteen public wards and seven amphitheaters.

A view of the Episcopal Hospital.

"HONESTY BUILT INTO EVERY INCH"

By ERMON ALLEN, *Factory Supt.* Frank S. Betz Company, Hammond, Indiana

Down through the ages honesty has been associated with the workers in metals.

There is a tradition of truth around a shop where they temper and turn steel. The present day descendants of Tubal Cain love to work in a plant and a job where they are instructed to build honesty into every inch.

If you could watch the craftsmen who build WHITE KRAFT Metal Furniture—if you could talk to them—you would realize that the reputation won by the finished product is earned by the honesty these men build into every inch of their job.

Aside from mechanical ingenuities and skillful designing, which are both factors, it is this fundamental honesty of craftsmanship which is your assurance of long and satisfactory service when you are WHITE KRAFT equipped.

See Our Exhibit at Booth 146, 147, Section B

Fitting White Kraft Furniture in the Factory of the Frank S. Betz Co.

September, 1926

CONVENTION SUPPLEMENT

53

Laboratory building, Philadelphia General Hospital.

theaters for clinical teaching in medicine and surgery. The group consists of the central building devoted to general hospital and admission work; the Gibson wing for chronic diseases; the D. Hayes Agnew pavilion, containing four surgical wards and three amphitheaters; the William Pepper Laboratory of Clinical Medicine; the obstetrical pavilion containing three wards and a private amphitheater for teaching purposes and the isolation pavilion both at the rear, and the medical pavilion with dispensaries in the basement. The hospital takes particular pride in its social service, out-patient and surgery departments.

Another hospital of university affiliation is the Jefferson Medical College Hospital, located at Tenth and Sansom streets. As its name indicates, the hospital provides the clinical teaching facilities for the medical students and is under the same board of trustees as is the college.

The hospital, which has over 600 beds, has been in operation for over a century and has had a dispensary

since 1828. Through constant enlargement it has grown with the demands of the population and of the medical college. The maternity wards and out-patient department are located within easy walking distance of the main building, at 224-226 South Seventh street. The department of diseases of the chest is located at 236-238 Pine street, and the Convalescent Home for Men, known by the name of Ivycroft Farm, is located at Wayne, Pa. Some of the especial features of interest at the hospital are the bronchoscopic clinic, the x-ray department and the private patient building. Dr. Henry K. Mohler is superintendent and medical director of the hospital.

Affiliated with the Woman's Medical College of Pennsylvania is the Hospital of the Woman's Medical College of Pennsylvania, an institution of 134 beds, located at 2121 N. College avenue. Although it is connected with the Woman's Medical College it is a general hospital

Misericordia Hospital.

and admits all types of cases. Dr. Anne H. Thomas is director of the hospital.

Philadelphia has three Jewish hospitals, namely, the Jewish Hospital at York and Toabro Road, the Jewish Maternity Hospital at 532-534 Spruce street and Mt. Sinai Hospital, at 1429 Fifth street. The Jewish Hospital was founded in 1885 and is a constituent of the Federation of Jewish Charities of Philadelphia. It has a capacity of 210 beds and admits a large percentage of charity cases. Among the interesting features of the institution to which Alfred Mayer, administrator, directs attention, are the nurses' dining room, the cardiac department and the pathological department. Mt. Sinai Hospital, a 160-bed general hospital open to the public, has unusually fine chemical, bacteriological and pathological laboratories. Visitors will also be interested in seeing the roof garden which covers an area of 40,000 square feet and is unusually attractive. The x-ray department and bronchoscopic clinic are also well worth seeing.

Among the larger Catholic hospitals are Misericordia and St. Agnes, the former located at Fifty-fourth and Cedar avenue and the latter at 1900 S. Broad street. Misericordia is located in the heart of a manufacturing district quite far from any other hospital of the city. The casual sightseer cannot but be attracted to this building of stately beauty looming among the huge factories of this district. Because of its location in this industrial center a large part of its service is out-patient. The visitor to this institution is usually much impressed by the beautiful lobby that is furnished in mahogany and

Hahnemann Hospital, one of the city's oldest hospitals.

See for yourself!

*Simmons Steel Bedroom Furniture
Henry Ford Hospital Beds*

EXHIBIT SPACES: 177, 178, 179, 180

Any hospital superintendent or buyer will admit that every argument which has been put forward in the advertising pages of this magazine, points to Simmons Steel Bedroom Furniture as the one logical furniture for hospitals. Every fact that has been presented, points to the Henry Ford Hospital Bed as the ultimate hospital bed.

But anything we have said is weak in comparison with the Simmons exhibits at the Atlantic City Convention.

There, you may see for yourself. Words and pictures could never be so convincing as the demonstrated merits of Simmons Steel Bedroom Furniture and Henry Ford Hospital Beds in the model hospital bedrooms arranged for your inspection.

Contract Department

THE SIMMONS COMPANY

666 Lake Shore Drive, Chicago

has appropriate accessories. The main floor houses a few private patients as do the second and fourth floors. The third floor is the ward floor and the fifth houses the maternity department and operating rooms.

On the sixth floor of the main building is the attractive roof garden built in the architectural style of the old mediaeval monasteries with covered passageways supported by huge columns. The classrooms for nurses and interns and a compact isolation suite are also contained on this floor. Mother Edmonda, superintendent, points with pride to the pathological laboratory, school of nursing and surgical dressing centralization as especial features of which Misericordia Hospital is justly proud.

St. Agnes Hospital also houses 300 patients. The especial feature of the hospital is the new five-story nurses' home which accommodates 125 nurses. It has three wings, an attractive roof garden and several sun rooms that add to the pleasure and convenience of the nurses.

Other Catholic hospitals of interest to the visitor are St. Joseph's Hospital, at Sixteenth and Girard Avenue, which offers its school of nursing, pathological department and x-ray department as special features, and St. Mary's Hospital, at Frankford Avenue and Palmer street, which has a capacity of 200 beds.

The Methodist Episcopal Hospital is one of the beautiful hospitals of the city. It is located at Broad and Wolf streets and is a 300-bed institution. The men's and women's wards are circular in form with terrazzo floors and tiled walls. The surgical pavilion connects with the main building by a corridor. The Freeman Solarium, a gift of Frank A. Freeman, connects with the various buildings and forms an attractive entrance similar to a foyer of a hotel. Of especial interest is the new five-story private pavilion which has been built according to the

The Lankenau Hospital, originally the old German Hospital.

most modern ideas with respect to light and ventilation. The first floor of the new pavilion contains the class and demonstration rooms for the nurses and a fully equipped children's department of fifty beds.

The third floor is used for private maternity cases and has a delivery room, labor and accessory rooms and a nursery. On the fifth floor is the private operating room. Each floor is a complete unit in itself, containing workroom and diet kitchen. The new nurses' home and the school of nursing organization are all features that will interest the visitor, according to May A. Middleton, superintendent.

The Episcopal Hospital, organized under auspices of the Protestant Episcopal Church in 1852, is located at Front street and Lehigh Avenue. The hospital comprises two city blocks and has a capacity of 450 beds. The main group of pavilions consists of five units with additional buildings for children and convalescents. Some of the especial features of interest are the pathological laboratory, dispensary and accident ward and its record system.

The Germantown Dispensary and Hospital is situated on the east side of Germantown, near Wister Station, on the Philadelphia and Reading Railroad. The hospital, which has a bed capacity of 180, is approximately situated on a ten-acre plot of beautiful wooded country, insuring quietness, and an abundance of sunshine and fresh air. The institution consists of ten buildings.

One of the main features of interest at this hospital is the obstetrical pavilion which is separate from the main hospital. The private patient pavilion is also separated from the main hospital and is surrounded by a beautiful lawn of several acres, containing twenty-four private rooms and accommodation for relatives and friends.

The Germantown Hospital.

Selecting Your Soaps

from a scientific standpoint

At Atlantic City
Sept. 27 to Oct. 1

Booth 108

Twenty-Eighth Annual Convention of
The American Hospital Association

"Buy a good pure soap" says one doctor; "a mild white soap" another might urge—and both be absolutely wrong!

Today soap is made under entirely modern conditions which have relegated old rules of selection. Such general recommendations as those above, are **meaning'ess**. Today most doctors are being more specific in what they tell patients.

Palmolive Soap is now widely used in hospitals for patients' personal use. Ask the staff—they'll say they like it, too. Everyone who uses mild, soothing Palmolive prefers it, and for many reasons too lengthy for discussion here. We will gladly send "**Which Soap, Doctor?**" a semi-technical brochure, upon request.

Palmolive is readily soluble in the water you are using—soluble, too, in low temperatures, unlike most soaps. It rinses perfectly, without leaving a residue to irritate the skin, without causing chapping.

Send for our latest price list. It will be very useful, will point out Palmolive economies in every department. You should have it. Write today.

The Palmolive Company
(Del. Corp.)

360 N. Michigan Ave., Chicago, Ill.

of patients. The building has a separate endowment fund of \$50,000 but because it houses pay patients only the building has been practically self-sustaining.

Those interested in children's hospitals may visit the Children's Hospital of Philadelphia, located at Eighteenth and Bainbridge streets, and the Children's Homeopathic Hospital, at Franklin, Thompson and Eighth streets. The former hospital treats children twelve years and under and is affiliated with the University of Pennsylvania. It is equipped to care for 100 in-patients. Some of the special features are the department for disease prevention, milk laboratory and the school of nursing.

The Children's Homeopathic Hospital is open to pediatric cases and is equipped to care for 165 patients. It has a well organized training school and social service department.

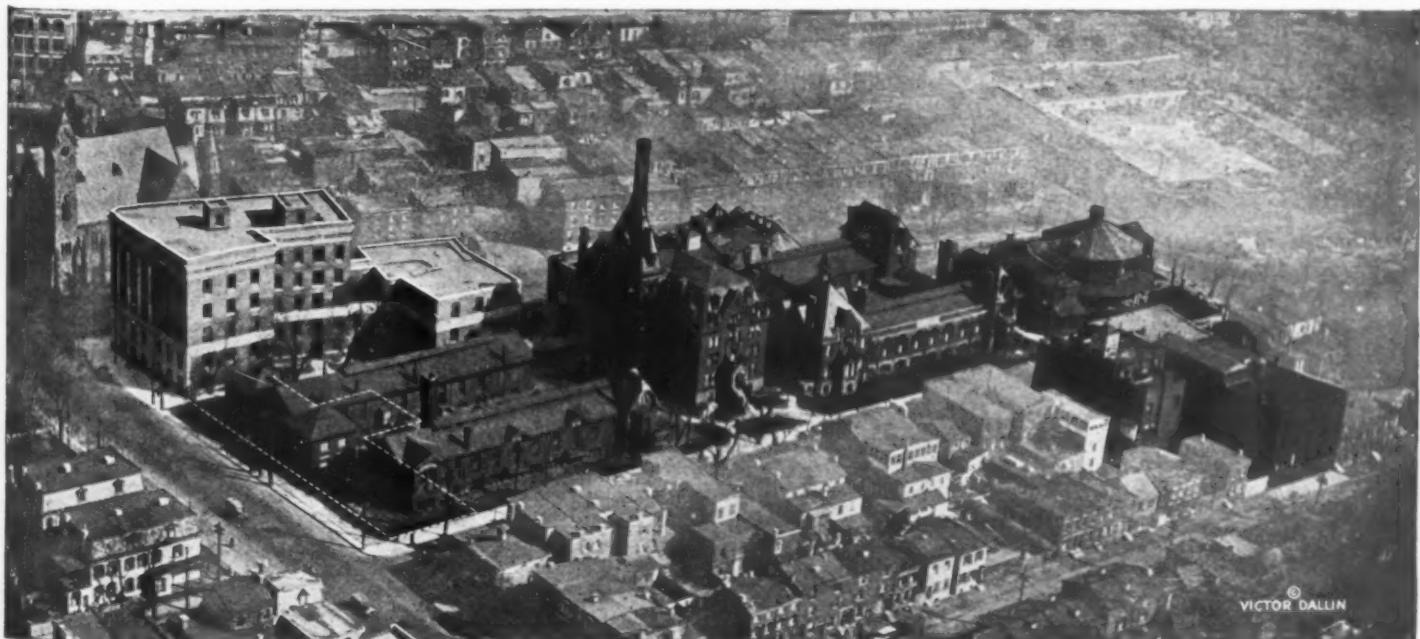

Those who wish to visit hospitals devoted to mental and nervous diseases will have a good opportunity to do this in Philadelphia where there are the following hospitals of this type: Department for Mental and Nervous Diseases of the Pennsylvania Hospital, at Forty-fourth and Market streets, the Philadelphia Orthopedic Hospital and Infirmary for Nervous Diseases at the northwest corner of Seventeenth and Summer streets, and the U. S. Veterans' Hospital No. 49, at Twenty-fourth and Grays Ferry Road, which is devoted to the care of neuropsychiatric veterans of the World War. The Department for Mental and Nervous Diseases of the Pennsylvania has a very complete system of mental examinations and a well developed occupational therapy department. The Philadelphia Orthopedic Hospital and Infirmary for Nervous Diseases has a well organized out-patient department that is well worth studying. The Veterans' hospital is equipped to care for 300 patients and has an exceptional x-ray and pathological laboratory. Its hydrotherapy and physiotherapy departments are also models.

Other special types of hospitals that may interest the visitor are Rush Hospital for Consumption and Allied Diseases, located at Thirty-third and Lancaster avenue, which is a 135-bed institution devoted exclusively to tuberculosis cases; the Philadelphia Hospital for Contagious Diseases, at 4001 Second street, which houses 1,000 pa-

Jefferson Medical College Hospital.

tients, and is noted for its special equipment for the endoscopic treatment of laryngeal diphtheria; and the Wills Hospital, located at 1810 Race street. Other hospitals devoted to specialties are the American

CONVENTION SUPPLEMENT

59

Hospital for Diseases of the Stomach, at 1809 Wallace street, and the American Oncologic Hospital, at Thirty-third and Powelton avenue.

At Seventh and Lombard streets is located the Eagle-ville Sanatorium for Consumptives, with a sanatorium capacity of 130 beds and a hospital capacity of fifty beds. Its special feature of interest is its index system.

Philadelphia has several women's hospitals some of which are the Woman's Hospital of Philadelphia, at 2137 College avenue, with 185 beds for the care of women and children; the West Philadelphia Hospital for Women, at 4035 Parrish street, with 115 beds devoted exclusively to women patients. This hospital is especially noted for its prenatal and postnatal and heart clinics as well as for its maternity department. Other women's hospitals are the Kensington Hospital for Women, at 136 Diamond street, which specializes in surgical and obstetrical cases, the Jewish Maternity Hospital which is devoted exclusively to obstetrical cases, Preston Retreat, at Twentieth and Hamilton streets, a private maternity hospital of fifty beds, and Philadelphia Lying-in Hospital, at 126 N. Eleventh street.

Some of the smaller hospitals that superintendents may wish to visit are: Abington Memorial, at York and Woodland Roads, a 140 bed hospital; Fabiana Italian Hospital, at Tenth and Christian streets, having forty-two beds; the Dr. William L. Clark Hospital, at 2215 Walnut street, having fifty beds; the Frederick Douglas Memorial Hospital, at 1530-36 Lombard avenue, having fifty beds; Frankford Hospital, at Frankford and Wakeling streets, having 118 beds; Garretson Hospital of Temple University, at 1813 Hamilton street, having thirty-one beds; Girard College Infirmary, at Girard and Corinthian avenues, having 124 beds; Hayes Mechanics Home Hospital, at Belmont and Lankenau avenues, having ten beds; Howard Hospital, at 801 South Broad street, having eighty-five beds; Hospital of the Woman's Medical College of Pennsylvania, at 2121 North College avenue, having 134 beds; Hospital of the Church Home for Children, at Fifty-eighth street

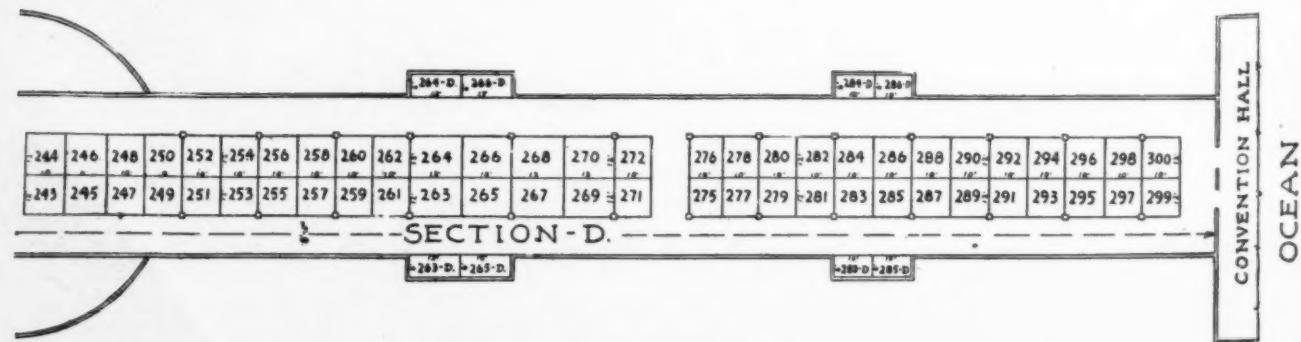

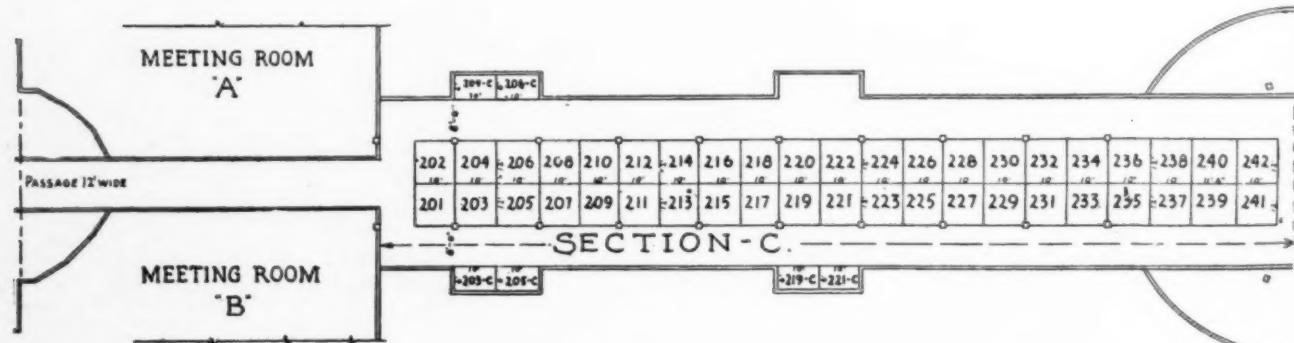

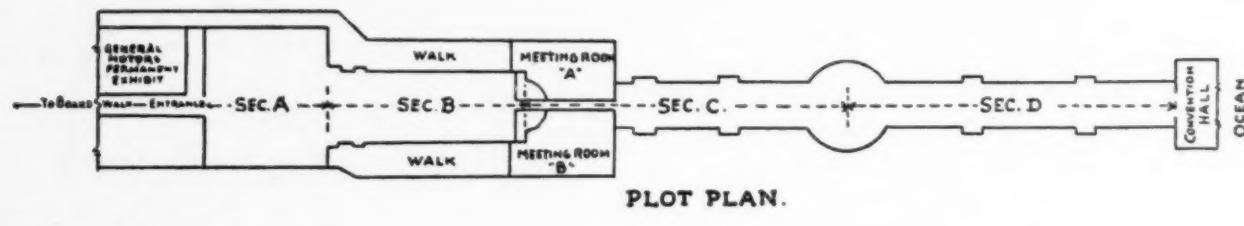

Front view, Hospital of the University of Pennsylvania.

and Baltimore avenue, having sixteen beds; Hospital of the Indigent Widow's and Single Women's Society of Pennsylvania, at 3615 Chestnut street, having twenty-five beds; Hospital of the Old Ladies' Home of Philadelphia, at State Road, Wissoming, having twenty-eight beds; House of St. Michael and All Angels for Young Colored Cripples, at 613 North Forty-third street, having forty beds; Kiefaber Memorial Hospital, at 6950 Germantown avenue, having seventeen beds; Monahan Hospital, at 1920 Race street, Lucien Moss Home, at York and Tabor Road, having fifty-seven beds; Northern Liberties Hospital, at 808 North Seventh street, having seventy beds; Northeastern Hospital of Philadelphia, at 2359 East Allegheny avenue, having seventy-five beds; Polyergic Hospital, at 3219 Diamond street, having sixteen beds; the Joseph Price Hospital, at 241 North Eighteenth street, having eighty beds; and St. Luke's Homeopathic Hospital, at 4414 Broad street, having a bed capacity of fifty-five.

STEEL PIER AFFORDS EXCELLENT SETTING FOR EXPOSITION

THE Steel Pier at Atlantic City, N. J., is the ideal place to hold the exposition and meetings of the American Hospital Association. The Pier lends itself to the display of products used by hospitals to an extent that has not been possible in other expositions held during the past few years. All of the meetings will be held on the Pier itself, and Marine Hall where the larger meetings will be held is at the extreme end thereby giving those attending the meetings an opportunity to view and visit the booths of the exhibitors before entering the meeting. There is practically no preferred position this year, as all who attend the sessions will daily pass all of the booths and exhibits. All of the meetings and booths are on one floor, which arrangement is also an advantage to those wishing to see and talk with salesmen.

Where to Start Inspection Tour

From the Boardwalk and back some distance on the pier is the permanent exhibit of one of the country's largest manufacturers. Back of this will come the registration booths and back farther are the hospital exhibits. At the beginning there will be four aisles narrowing down to two double aisles and finally after the two center halls are passed narrowing still further to two single aisles. At the end of these aisles is Marine Hall, the main meeting place.

For those who wish to see all of the exhibit systematically it will be found more advantageous to start at the right aisle and to visit the booths in sections. In the first section will be found all of the heavier machinery, such as dishwashing machines, some operating tables, various heavy demonstrating exhibits and generally the heavier types of equipment used in hospitals. In Section B, which is directly back of this, will be found some of the lighter types of equipment and general clinical equipment. Operating room equipment, lighter kitchen utensils and machinery and the usual exhibits of furnishings.

Back of the meeting halls in the center of the Pier will come the long stretch of booths leading back to Marine Hall. Here will be some of the most interesting displays to be found on the entire Pier. One of the large manufacturers of signal systems has space here as well as several of the linen houses and uniform manufacturers.

This year there will probably be more new goods exhibited than ever before. Nearly every exhibitor will have improved and refined articles to display and most of them are making elaborate preparations to make this exhibit of as great an educational value as possible.

State Associations to Have Booths

Manufacturers have come to know that with hospital superintendents the educational value is much appreciated and that only by showing the extreme worth of all their products will attention be given to the exhibit. Superintendents come from all over the country to attend the meetings and to visit the booths and there are many who carry with them long lists of products in which they are interested and will want to know every feature of every product. This will be especially true this year with eastern superintendents who will find it an easy matter to make selections from the exhibit floor to fill their immediate needs.

This year the state associations that will have booths will be in a particular part of the hall somewhat apart from the exhibitors. This will also be true of the agencies serving the hospital field and the allied associations who yearly have professional exhibits of their work. The American Association of Hospital Social Workers, the American College of Surgeons, the American Occupational Therapy Association, the Committee on Dispensary Development, the Hospital Dietetic Council, the Child Welfare Association, the United Hospital Fund of New York and many of the other associations and councils will be exhibitors and will display the fruits of their labors during the past year. Charts, statistics, results of research, surveys and graphs will be intelligently and interestingly displayed.

Among the states that have signified their intention of having a booth that will be used as a meeting place for hospital people from their section of the country are: The Colorado Hospital Association, the Indiana Hospital Association, the Minnesota Hospital Association, the New England Hospital Association, the New Jersey Hospital Association, the North Carolina Hospital Association and the Ohio Hospital Association. The assignment of booths to these organizations will be made just prior to the opening of the convention. At these booths there will be present attendants who will take messages and be generally helpful to delegates.

Many of the commercial exhibits will be intensely instructive. One manufacturer is planning on having moving pictures at various times during the day while several of the others will have demonstrations showing how their products are made and detailing step by step the processes of manufacture. These exhibits are always popular with the visitors.

Boy Scouts to Be Active

One particularly convenient feature that superintendents will find at the exhibit will be the aid given to the strangers in the city by the Boy Scout troops. At Atlantic City these boys make a practice of helping every convention visitor and are always busy around the Pier running errands and in other ways doing their "good deed a day" except that these particular boys do not confine themselves to one good deed but to many deeds from early in the morning until late in the evening. This is a service that will be much appreciated.

An educational feature of interest will be the model reception room for an out-patient department to be exhibited under the auspices of the Committee on Out-Patient Service. On the walls of the model waiting room will be placed pictures or illustrations of all the various departments that are essential to the adequately equipped out-patient service in a hospital.

The Steel Pier is handy to every part of Atlantic City. One can stay there until the doors are closed and still reach the hotels within ten minutes. To those who are staying at the nearby hotels the exhibit will be readily accessible.

The local exhibit committee is composed of W. Crane Lyon, formerly superintendent, Mercer Hospital, Trenton, N. J., now engaged in hospital consultant work in New York; Thomas R. Zulich, superintendent, Paterson General Hospital, Paterson, N. J., and Dr. M. James Fine.

PHILADELPHIA

INSIGNE DESIGNS WILL BE EXHIBITED AT ATLANTIC CITY MEETING

Delegates May Vote for Their Choice of Emblem

THE committee on insigne, consisting of Dr. A. C. Bachmeyer, superintendent, Cincinnati General Hospital, Cincinnati, and president, American Hospital Association; Asa S. Bacon, superintendent, Presbyterian Hospital, Chicago; Mr. Tom Jones, University of Illinois School of Medicine, Chicago, and John A. McNamara, managing editor, *THE MODERN HOSPITAL*, Chicago, has decided that all of the designs and suggestions that have been received shall be exhibited at the Twenty-Eighth Annual Conference and Exposition of the American Hospital Association at Steel Pier, Atlantic City, September 27 to October 1, so that all of those superintendents and other hospital people attending the convention will be able to view and compare the various insignia.

The response from the hospital field has been enthusiastic and inasmuch as most of the state associations and the trustees of the American Hospital Association have highly endorsed the "quest" for a suitable emblem for hospitals, by exhibiting at this time it will give those people who are most interested in the selection an opportunity to see side by side those designs that have been received.

There will be over thirty of these drawings shown and each one will be of uniform size. Each will be numbered and the names of the designers will not be visible. Those viewing the insignia will be asked to vote upon them, giving their first three choices. In this manner the committee will be guided in the final selection.

The designs are the work of the best artists and architects of the country who were asked to contribute toward securing an insigne. Forty of these men were asked to submit drawings and most of them have responded. Then, too, there were many suggestions received from hospital superintendents and these ideas were worked into designs by an artist and will be displayed at the convention.

It is believed that most of the designs that will be shown are adaptable to the uses that an insigne would be put by the hospitals of this country and Canada. All of them have a significance and are of such a nature that they can be protected by copyright or by an act of Congress.

The search for an insigne has been an interesting and difficult one. All sorts of suggestions have been carefully considered and many volumes of heraldry and designs have been gone over in the quest. The aim has been to get as many suggestions as possible and then to narrow these down to those that would be feasible for use by all hospitals regardless of creed. Obviously the design must be extremely simple and still be comprehensive enough to cover the many purposes of the hospitals of the country. It must not contain anything that would give offense and it must be artistic enough to be popular with every type of institution. It is expected that its significance to the public will be as great as the Red Cross is now and will stand out as boldly and be as easily recognized as the Tuberculosis cross, the Y. M. C. A. triangle.

When the insigne is finally selected it will be immediately protected against commercial uses and the American Hospital Association will be its trustee, sanctioning its use by hospitals that meet certain requirements. This does not mean that only members of the American Hospital Association will be allowed to use it but that the association will be the guardian against the misuse of the insigne.

It has been generally agreed that the use of an insigne by hospitals will bring them closer together and closer to the communities that they serve. It will become the emblem of mercy and the badge of humanity. It will signify cure of disease, prevention of illness, education and research and these are the fourfold purposes of every hospital and the aims they strive to reach.

Insigne Vote

In order that the committee on insigne may be guided in its final selection please mark by number your first three choices and deposit at Booth 19-20.

The color quality of daylight has particular and important advantages over ordinary artificial light. Under daylight skin and flesh colors are always seen naturally, quickly and without effort or uncertainty. Macbeth Daylighting is a satisfying visual reproduction of good natural daylight produced with standard clear glass incandescent electric lamps and accurate colored glass filters.

Not a lamp, but a lighting system adapted to the location

Send particulars as to size of room, height of ceiling with wall and ceiling structural conditions.

By omitting the expensive skylight and unduly large windows (note the Boston and Cleveland illustrations above) this equipment becomes exceedingly moderate in cost.

Can the hospital afford not to have a superior lighting equipment that costs as much as sterilizing apparatus and does not cost more during an operation than the ether administered at the same time? Macbeth Daylighting, now ten years on the market, has been approved and is used by thousands of color experts in widely varying fields where "seeing as in daylight" is important.

The effect of this artificial daylight cannot be adequately or intelligently described. If you see it you won't need a description—you realize instantly that it is different and more eye-satisfying than any other artificial light.

Can now be seen in:

AT THE CONVENTION
BOOTH 93

NEW YORK HOSPITAL FACILITIES OFFER MANY INTERESTING FEATURES

TO MANY who attend the convention the trip to the East would not be complete without visiting hospitals in both Philadelphia and New York. In another part of this supplement is an article that tells of the many hospitals that may be seen in Philadelphia and the recent developments of these hospitals. Herewith we will present a short guide to the New York and Brooklyn Hospitals. Obviously it would be impossible to visit all of the hospitals in New York because there are so many of them and because they are scattered over the several boroughs of the city. We have, therefore, picked only some of those that will be of interest to the visitor. No doubt many omitted from this short list should also be visited and will be by those who stop at the metropolis to visit hospitals.

Because of the size of the city it will be better to list the hospitals according to groups in the same general locality. Bellevue, New York Post-Graduate, Willard Parker and Reception, Beth Israel, St. Mark's and St. Vincent's Hospitals form the first group.

Bellevue Hospital is located at First avenue and Twenty-sixth street and is the biggest institution on Manhattan Island. It has 1,689 beds and does much of the emergency work for the city and has a psychopathic ward for the observation of city cases. Dr. Mark L. Fleming is the medical superintendent of this institution.

The New York Post-Graduate Medical School and Hospital, a teaching hospital of 383 beds, is located at 303 E. Sixteenth street. Col. Louis C. Trimble is the superintendent.

The Willard Parker and Reception Hospitals are located at the foot of East Sixteenth street and have 806 beds.

Dr. Shirley W. Parker is superintendent of the hospital.

St. Mark's Hospital is located at 179 Second avenue and, while it has but 175 beds, is a unique and picturesque institution. Dr. John F. Bresnahan is the director of this hospital.

Beth Israel Hospital is located at 70 Jefferson street. It has recently erected a new building and it is understood that it has one of the finest types of kitchen arrangement of any of the larger hospitals. It has 139 beds. Louis J. Frank is the superintendent.

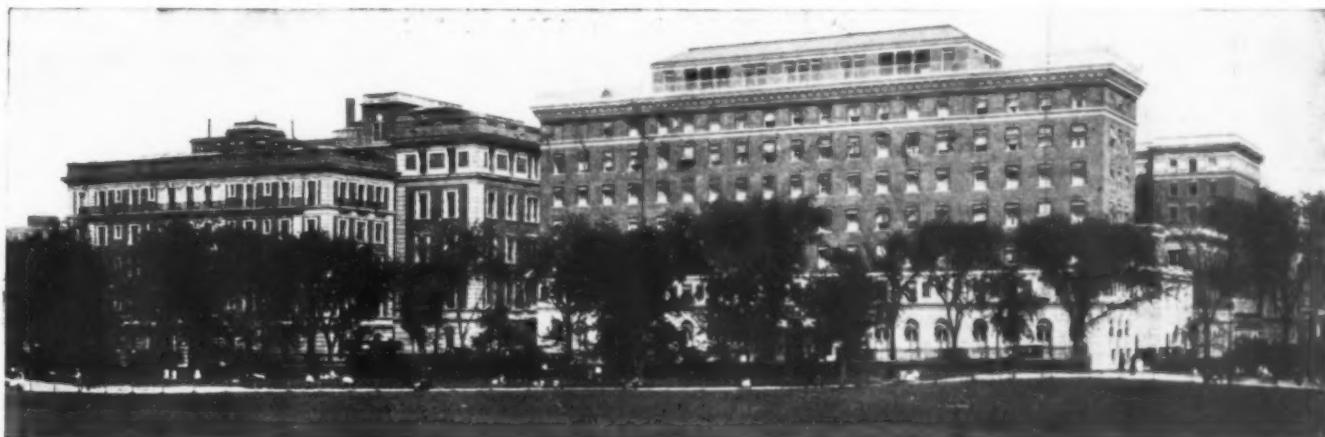

St. Vincent's Hospital is on the west side of town, bordering a business and manufacturing center and has

Long Island College Hospital, Brooklyn.

many interesting features. This hospital has recently raised funds for new buildings. At present it has 350 beds. Sister Anne Borromeo is now superintendent of the institution.

In the upper part of the city is another interesting group of six hospitals that are worth inspection. In this group are Mount Sinai, Fifth Avenue, Flower, Presby-

SUBVEYORS

SOLVE FOOD AND
DISH HANDLING PROBLEMS

Model "F" Subveyor

FOOD SERVICE

Subveyors will elevate food either on trays or in containers continuously to any number of floors. Visualize the economies resulting from an installation in your institution. There are hundreds of Subveyors in operation throughout the entire country which are daily demonstrating the economy and efficiency of this equipment. Model "F" Subveyor illustrated to the left is the model for Food Service. Complete catalog and interesting Food Service Survey are yours for the asking.

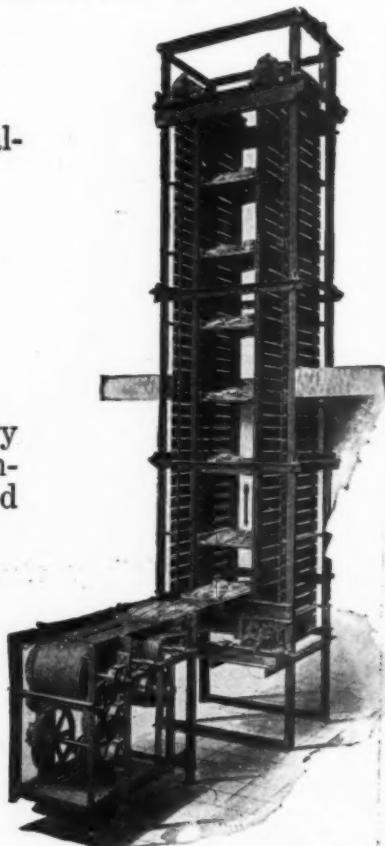

CENTRALIZED DISH WASHING DEPARTMENTS

Booths 87, 88

Dishwashing departments of hospitals should be centralized in one department for the following reasons:

- (1) Reduce your investment in unnecessary equipment.
- (2) Confine noises and odors incident to dish washing departments to an isolated location.
- (3) Have absolute control of dishwashing crew.
- (4) Have more room for patients.
- (5) Reduce china breakage (more than 50 per cent).

The Model "A" Subveyor illustrated to the right will carry trays of soiled dishes from any number of floors to the centralized dishwashing department. Trays are discharged automatically from vertical to horizontal section which in turn discharges trays upon scrapping table. Complete detailed information on centralized dishwashing departments will be sent on request.

The Fifth Avenue Hospital, which is near Fifth avenue and 105th street, is also a well known institution of considerable size. Dr. Wiley E. Woodbury is the director and there are 300 beds in the institution.

Flower Hospital is located at Sixty-fourth street and Avenue A, which is the upper East side. There are 275 beds in this hospital and Fred J. Loase is the superintendent.

The Presbyterian Hospital, of which John F. Bush is superintendent, is located at 41 East Seventieth street, and has 255 beds.

The Hospital for Joint Diseases, one of the largest institutions of its kind in the country, is located at 41 East 123rd street and Oliver H. Bartine is the superintendent. It has 275 beds and many interesting features.

St. Luke's Hospital is located at 113th street and Amsterdam avenue. It has 417 beds and Rev. George F. Clover is the superintendent.

The Columbia-Presbyterian Medical Center is located at 157th street and Broadway. Some of the buildings are already under construction and others are planned to start at an early date. This will be one of the largest developments of its kind in the world and is being watched

MEET US AT ATLANTIC CITY

WE HAVE engaged booth No. 205 at the Commercial Exhibit to be held in connection with the annual convention of the American Hospital Association at Atlantic City, New Jersey, from September 27 to October 1. We extend to all delegates to the convention a cordial invitation to visit our booth. The men in charge will be glad to show samples and answer any questions.

Among the items on display in our booth will be:

Dennison's crepe paper napkins and tray covers, which are being used more and more by hospitals because

they are so attractive, sanitary and economical.

Dennison's paper towels, which have been found ideal by doctors and nurses—soft in texture and so absorbent that *one* towel really does dry both hands.

Tray covers with children's designs to add a happy touch to the little tots' wards.

And the other Dennison crepe paper specialties: bibs, surgeons' caps, thermometer wipers, ether wipes, and handkerchiefs—as well as diet cards and diet card holders.

Dennison's

OF COURSE, you don't have to visit the Convention, or wait until September 27, to learn about Dennison's Hospital Specialties. Just use this coupon, now.

Maternity building, Methodist Episcopal Hospital, Brooklyn.

with a great deal of interest by hospital executives in all parts of the world.

Of interest is the new pavilion of the Roosevelt Hospital, located at 428 W. Fifty-ninth street.

Further up and in the Borough of the Bronx are two other hospitals that merit a visit from superintendents. Montefiore Hospital for Chronic Diseases, located at Jerome Avenue and Gun Hill Road, is of particular interest to those superintendents interested in this type of hospitalization. It has 764 beds and M. D. Goodman is the superintendent. Not far from this institution by automobile is the Fordham Hospital, situated at Southern Boulevard and Crotona avenue. It has 376 beds and C. D. O'Neil is the assistant superintendent.

Perhaps one of the most interesting groups of hospitals to be found in this part of the country is the state and municipal group on Welfare Island, Ward's Island and Randall's Island. On Welfare Island will be found the Correctional Hospital of 300 beds, the Metropolitan Hospital of New York City with 1,665 beds, the Neurological

Jewish Hospital, Brooklyn.

MAKING FRIENDS FOR THE HOSPITAL THROUGH A WELL-EDITED BULLETIN

The Hospital Bulletin, edited on a cooperative plan, is an idea which was originated by the Physicians' Record Company in May 1924. Judiciously edited—avoiding sensational newspaper style, but presenting forcefully the hospital's relation to the community—our Bulletin idea has grown and has been accepted by many institutions of standing.

EVERY hospital has faced at some time one of these problems—how to enlist financial support from influential members of the community, how to gain the active cooperation of local individuals or organizations, to find applicants for the training school, to interest desirable physicians in the hospital. The Hospital Bulletin has demonstrated its ability to solve these problems and many others. It is the medium through which you can tell the community what you are doing and what your needs are. It is the means of making friends for your institution.

OUR PLAN AND OUR EDITORIAL POLICY

Under our plan of publication the hospital selects the name for the publication, thereby making it distinctly the Bulletin of that institution. The copy appearing in each Bulletin is furnished partly by the hospital and partly by our organization. The hospital's copy will present local news and needs; ours will present the hospital message in general with interesting health news and other items.

Of course, the object of this cooperative editorial plan is to reduce the cost to the hospital and to make it easier for the institution to gather its material.

As for our editorial policy: This department is handled by a staff fully conversant with the hospital's problems, experienced in editorial work and equipped

with judgment as to what is proper material for such a publication. Controversial subjects have never been permitted to enter into any of our columns.

UNSOLICITED COMMENTS ON OUR BULLETINS

We present here a few striking comments from those who are subscribers to our service.

"I am delighted with the proofs of the items which will appear on the inside pages of the Bulletin. Such material meets very fully my conception of what the Bulletin should present to its readers." A Colorado Hospital.

"We are pleased with this new venture and it already appears to us that we are justified in expecting good results." A Massachusetts Hospital.

"Bulletin very well gotten up and much pleased with it." A Connecticut Hospital.

"We congratulate you upon your original idea of rendering such a valuable service to the small hospital." A Nebraska Hospital.

FULL DETAILS WILL BE SENT TO YOU

We will welcome the opportunity to send to hospital executives complete information regarding our plan, prices, etc., together with sample copies.

If you are going to attend the American Hospital Association Convention at Atlantic City, come and talk to us about the Bulletin. Our booth will be Number 42.

Roosevelt Hospital

Hospital with 500 beds, the New York City Hospital with 1,060 beds, the Tuberculosis Infirmary with 1,665 beds and the New York Cancer Institute.

In Brooklyn there are nearly as many interesting hospitals as in Manhattan. These will be grouped together although they are rather far removed from each other.

The Brooklyn Hospital is situated at Raymond street and De Kalb avenue, and Dr. Willis G. Nealey is the director. This institution is a busy one with a large outpatient service. It is 294 beds.

The Jewish Hospital of Brooklyn, of which Dr. J. E. Daugherty is superintendent, is also about to enlarge its quarters. This hospital is located at Classon avenue and St. Mark's place and has 355 beds.

The Long Island College Hospital is located at Henry and Amity streets, and Sheldon L. Butler is the superintendent. It is a teaching hospital with 490 beds.

The Methodist Episcopal Hospital is located at Seventh avenue and Sixth street, and the Rev. James E. Holmes is the superintendent. It has 225 beds, some of which are in the new maternity building.

Brooklyn State Hospital is located at 601 Clarkson street and has 1,190 beds. Dr. Isham G. Harris is the superintendent.

Kings County Hospital is located on Clarkson street also, and Dr. Mortimer D. Jones is the superintendent of this institution, which has 1,809 beds.

St. Catherine's Hospital, a 296-bed institution, is located at 133 Bushwick avenue. Sister M. Gundisalva is the superintendent.

The new nurses' home of the United Israel Zion Hospital is worth a trip to see. It is one of the finest in the country with a swimming pool, gymnasium and excellent appointments. The hospital itself is comparatively new and modern. Boris Fingerhood is the superintendent and there are 200 beds in the institution.

CONVENTION SUPPLEMENT

79

SIX HOSPITALS SERVE ATLANTIC CITY'S NEEDS

Between sessions of the conference some superintendents may wish to visit one or more of Atlantic City's hospitals. The city has six hospitals ranging in capacity from 400 to twenty beds.

The largest and probably the most interesting hospital is the Children's Seashore House for Invalid Children, located at Atlantic and Richland avenues, with a capacity of 400 beds. This hospital, which is thought to be the first of its kind in this country, was opened in 1872 as a small cottage for the care of crippled children. The following year a new building was erected to house forty-five children. During the next three decades the building was enlarged to accommodate 235 mothers and children. In 1902 the building was moved to its present location.

The institution was first established to provide medical care and a salubrious environment for children suffering from non-contagious diseases during the summer months. Now the hospital is open throughout the year. Children over three years of age are cared for in the airy wards of the main building and those too young to be separated from their mothers are assigned to separate rooms with their respective mothers. A separate ward located on the beach is used for serious cases, and ninety beds are set aside for children suffering from tuberculosis of the bones and joints.

During the summer a separate pavilion is set aside for the care of older girls who do not need the restraint necessarily imposed upon the younger children.

Dr. E. Z. Holt is the physician in charge.

The Atlantic City Hospital, located at 26 East Ohio

avenue, has a capacity of 225 beds. It has been in existence since 1898 and has never been a city hospital in the full meaning of the word. Although the city contributes towards the upkeep of the hospital the amount has never been sufficient to defray the cost of free patients.

Through the efforts of the women's auxiliary of the hospital, through its annual bazaars, a large part of the hospital's debt has been cleared. This organization also made possible the erection of the nurses' home in 1907 and has done much toward the purchase of equipment for the hospital.

A large part of the hospital's work is dispensary and emergency service.

Nellie McGurnan, R.N., is superintendent of the hospital.

The Municipal Hospital, or the city's hospital for the treatment and detention of contagious diseases, is located at Virginia and Adriatic streets and has a capacity of sixty-two beds. Dr. Samuel L. Salasin is medical superintendent of the hospital.

The capacity of the hospital is divided into four wards, one for measles, one for smallpox, one for diphtheria and the fourth for scarlet fever. In addition to the foregoing public wards the hospital has well furnished private and semi-private rooms for patients who are able to pay in proportion to the accommodation placed at their disposal.

The other hospitals are Leonard's Sanitarium, a private convalescent hospital of twenty-five beds, located at 2842 Atlantic avenue; the North American Sanitarium for Bone Tuberculosis, a hospital of forty-two beds, and the Wayne-Leonard Sanitarium, a general hospital of twenty-five beds, located at 130 South Maryland avenue.

STATE ASSOCIATIONS PLAN MEETINGS AT CONVENTION

FOLLOWING the custom of previous years, the several state hospital associations have made plans to hold meetings, luncheons and other gatherings for their members during the tenure of the American Hospital Association convention. Many have also planned to take advantage of the association's offer of space for booths in the exhibition section where they may feature pertinent displays or meet in a social manner.

While many of these state meetings are of a social nature, they have been arranged with the fixed purpose of discussing the subjects to be heard at the various sessions of the convention that are directly applicable to their own problems. Breakfasts at the hotel headquarters before the morning session, luncheons at restaurants and hotels on the Boardwalk, to discuss the previous papers and to anticipate those of the following session, and dinners again after the day's business has been concluded, have been planned so that state association members may gain the most benefit from the convention.

At many of these evening meetings the state organizations have planned open house at which any and all of the delegates to the convention are invited to attend in the interest of better acquaintance and for the further discussion of common problems.

Of an even more social nature are tentative beach parties, dependent upon the weather, planned by some of the organizations. Although several of the sectional bodies have definitely signified only one dinner or luncheon during the convention week, arrangements are pending for additional get-togethers, the definite plans for which will be announced during the daily sessions of the week.

Associations Have Booths

The booths devoted to the sectional organizations will be used, in many cases, in an attempt to portray the work already accomplished by the individual associations and what has been outlined for future development. Nurses or secretaries will be in constant attendance at many of the booths for the convenience of the delegates. All of the states will use their space on the exhibition floor as headquarters during the time that the meetings are not actually in session. Comfortable chairs or lounges and pleasant surroundings will offer appealing invitations for rest and quiet talks.

According to an announcement by Dr. William H. Walsh, executive secretary, American Hospital Association, the assignment of the state booths will not be made until the week of the convention. Those state or sectional associations that have made application for booths are Colorado, Ohio, Minnesota, Indiana, New Jersey, North Carolina and New England.

The Colorado Hospital Association will have its headquarters at the Ambassador Hotel where Dr. Edgar A. Bocock, superintendent, Colorado General Hospital, Denver, and executive secretary of the state association, will have luncheon with members of that association, Tuesday noon, September 28. A breakfast will be given by the state body, Thursday morning, September 30, at the Ambassador. At both of these get-together meetings will be discussions on such phases of the convention as appear to be of particular interest to the hospitals in the Rocky Mountain region.

During the convention week the formation of a Rocky Mountain Hospital Association will be discussed. According to tentative plans such an association would include those states adjacent to Colorado. An invitation to hos-

Arteries of the Hospital

Arteries of the hospital, like those of the body, are vital for its perfect coordination. Smooth operation, so essential in the hospital, requires equipment as near perfect as can be produced. Duriron acid-proof drain pipe, carrying the corrosive wastes from the laboratories, will serve without failure or repairs as long as the hospital stands. No other pipe material will do so. Duriron is essentially needed for sanitary insurance.

Duriron is produced only by

REPRESENTATIVE institutions everywhere are installing White House Units because the baked enamel finish (3 coats) makes them easier to clean. Just a wipe of a clean cloth and it is done. And the drawers, too, are easily removed and quickly cleaned.

White House Rigid Steel Construction is particularly desirable for the modern hospital where sanitation and durability are prime essentials. Fire-resisting and moisture proof—White House Steel Units are replacing wood cupboards everywhere for storing, preparing and serving food. Made in a unit system—fills any space.

We cordially invite you to visit

pital superintendents in the states of Wyoming, Utah, New Mexico, Arizona, Montana, Idaho and Nevada to attend these meetings for the organization of such a body has been extended to all these states by the Colorado association.

A noon luncheon, Thursday, September 30, at the Hotel Traymore, the headquarters of the Ohio Hospital Association, will be followed by an important business meeting of the association at which time the general policy of the Ohio association will be determined and also the nature of the next annual convention of that body. Whether the meeting will be limited to a one-day session without a commercial exhibit and devoted only to state problems or whether the two-day session will be continued will be decided at that time.

Breakfast Together Every Morning

In order to secure the most benefit from the daily sessions of the convention, the Hospital Association of New York State has made plans to meet every morning at breakfast where the program may be discussed and the important points designated. These early morning meetings will be held at the headquarters of the association which as yet has not been announced but will probably be posted at the convention headquarters.

According to Rev. H. L. Fritschel, president, Wisconsin Hospital Association, that group has made arrangements to meet at twelve o'clock, Wednesday, September 29, at the Ambassador Hotel, where the luncheon will be devoted to a business session.

The luncheon of the Indiana Hospital Association, Wednesday, September 29, will be dependent upon the number of delegates from that state attending the convention. Missouri F. Martin, secretary of the state association, has made tentative arrangements for this meeting.

Since the Minnesota Hospital Association held its annual state convention, August 31, final arrangements for the American Hospital Association convention were not determined until that time. According to William Mills, executive secretary, the association is planning to hold a number of get-togethers during the convention week and also a dinner and business meeting at their headquarters.

New Jersey to Hold Several Sessions

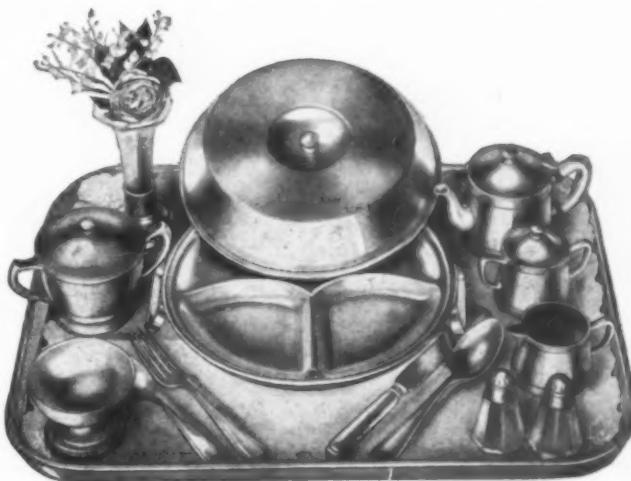

Although no definite date has been set for the dinner meeting of the New Jersey Hospital Association, that association is planning to hold several sessions during the time of the convention. Since the meeting is being held in Atlantic City, a large number of superintendents and other hospital personnel from the state of New Jersey will be present. The time and place of the dinner meeting and other sessions will be announced at an early session of the convention.

North Carolina is also planning to hold a luncheon meeting during the convention period but as yet no definite action has been taken.

A dinner meeting for the members of the Michigan Hospital Association has been planned but the date will not be announced until the sessions of the convention. The Michigan association is preparing a year book on the law and legislation in that state appertaining to hospitals and every effort is being made to have this ready for the convention week.

According to Dr. P. W. Wipperman, president, the Hospital Association of the State of Illinois will hold a breakfast on one of the mornings during the convention week. The date, time and place will be announced at an early session of the convention.

THORNER'S Silver Service

ATLANTIC CITY BUSINESS CLUBS EXTEND WELCOME

Fostering the idea of pleasant gatherings and lively and interesting discussions made possible by the presentation of viewpoints of outsiders, many of the civic clubs and societies of Atlantic City have extended invitations to the visiting delegates to the Twenty-Eighth Annual Convention of the American Hospital Association to attend the weekly meetings and luncheons of the several clubs and to avail themselves of the entertainment to be offered during the week of the convention.

Tentative arrangements have been made by some of these clubs to present speakers from the convention delegates at the weekly meetings, and the programs during the convention week have been planned to include interesting subjects associated with the hospital and allied fields.

While the meetings are primarily for members of the individual clubs many of the organizations have taken a step further and invited all delegates to the convention, regardless of membership, to meet with them at the weekly luncheons which are held at the various hotels, restaurants and clubs along the Boardwalk. Usually these luncheons are held at 12:30 p. m. on various days of the week and last, in most cases, about an hour, so that any convention delegate may attend the meeting, gain the benefit to be secured from such discussions and contacts and still be enabled to arrive at the afternoon sessions of the convention promptly at 2:30, the opening hour of the afternoon sessions.

Included among the delegates to the convention are many superintendents who are active members of the various civic clubs in their own cities and in previous years have always found such meetings to be of distinct interest and advantage. This year some of them are included on the programs of the local civic organizations. The possibility of meeting with associates, discussing common interests and of expressing individual opinions has always appealed to them.

Auxiliaries to Entertain Women

Many of the women's clubs of Atlantic City and various auxiliaries of hospitals in the vicinity have made arrangements to entertain the women delegates to the convention, as has been the custom at previous meetings of the association. Announcement of such programs will be made at the sessions of the convention.

The Atlantic City Exchange Club, through its secretary, Granville H. Steelman, has extended a cordial invitation to visiting "Exchangites" or any other delegates to the convention to make use of the headquarters of the club, at the Knickerbocker Hotel, on the Boardwalk at Tennessee Avenue, during the convention week. The national convention of the Exchange Club will be held at Atlantic City during the week of September 20 and many of the delegates to this convention will still be in Atlantic City for this meeting the following week. The local Exchange Club has made arrangements for a nationally known speaker from the hospital field to address the meeting of the club to be held October 1, and a special invitation has been extended to the visiting delegates to attend this meeting.

The weekly luncheon and meeting of the Civitan Club of Atlantic City will be held at the Ambassador Hotel, Brighton Avenue and the Boardwalk, Wednesday at 12:30 p. m. At this meeting all members of the Civitan Club from other cities are invited to be present. Other entertainments, which are regular features of the organiza-

tion's program, are also open to all visiting members.

The Rotary Club of Atlantic City holds its weekly meeting and luncheon at 12:30 p. m., Tuesday, at the Ritz-Carlton Hotel, on the Boardwalk at Iowa Avenue, and this meeting as well as others planned for the convention week will welcome all members who are delegates to the convention.

Kiwanis Club Holds Weekly Luncheon

According to Alexander Vollmer, president, the Kiwanis Club of Atlantic City, cordially invites all visiting Kiwanians to attend the weekly meeting and luncheon of the organization to be held at 12:30 p. m., Thursday, at the La Victoire Restaurant which is located on the Boardwalk not far from the Steel Pier.

Members of the Lions Club may secure information as to the date and place of the weekly meeting of that organization by communicating with Dr. David B. Allman, president.

According to Dr. D. W. Scanlan, president of the Atlantic County Medical Society, the society will not hold a meeting during the month of September. In previous years the society found that many of the members were on vacations at this time and the number of physicians remaining in the district were not sufficient to merit the calling of a meeting.

COMPLETE EXHIBIT OF NURSES' HOMES BY HOSPITAL SERVICE BUREAU

THIS year all of the available material and plans for nurses' homes will be exhibited by the Hospital Library and Service Bureau, Chicago. Donelda Hamlin, director, has planned an elaborate exhibit of data and it will be presented in its most attractive form.

Hospital superintendents, board members, medical staff, nurses, dietitians, occupational therapists, social workers and laboratory technicians all will find something of especial interest in the exhibit of booths 275, 277, 279, 281, 283 and 285, Section D, near the entrance to Marine Hall. Package libraries and bibliographies covering practically every phase of hospital work have been assembled by the bureau and a sufficient number will be displayed to indicate both the type and scope of the service available, without cost, to all people engaged in hospital and public health work.

Attractive Construction Exhibit

For those interested in construction there will be an attractive exhibit, a special feature of which will be the plans of nurses' homes constructed from 1920 to date. This will be particularly appropriate, as the committee on buildings—construction, maintenance and equipment will report on nurses' homes. It is expected that this report, which will be made on Thursday afternoon, will arouse considerable interest and that the exhibit of the Hospital Library and Service Bureau will be the Mecca for those wishing to look up points made by the committee. In addition, there will be shown plans of over eight hundred hospitals, sanatoriums, and medical schools, among which will be found plans of many general hospitals constructed within the past two years.

To hospitals having building programs under way these plans are invaluable. The exhibit will be arranged in such a manner as to permit of ample opportunity for carefully examining the plans. Supplementing them will be package libraries on general principles of hospital construction, on such phases as soundproofing, ratio of private rooms to wards and dimensions of private rooms.

hold many interesting
accomplishments in
efficient sterilizer
design and construction

Two years before the first annual convention of the American Hospital Association was held 28 years ago, the organizers of what was later to become the American Sterilizer Company conceived and designed that which was destined to be the first AMERICAN Sterilizer.

The great advancement made in sterilizer design and construction since then is shown in our exhibit in Booths Nos. 141 and 142 at this year's 28th Annual Convention of the Association in Atlantic City.

See the exhibit, or let us send "it" to you in the form of bulletins and other descriptive matter.
